Moyo, 2006-01-01 The First International Conference on Concrete Repair Rehabilitation and Retrofitting ICCRRR 2005 was held in Cape Town South Africa in November 2005 The conference was a collaborative venture by researchers from the South African Research Programme in Concrete Materials based at the Universities of Cape Town and The Witwatersrand and The Construction Materials Section at Leipzig University in Germany The conference focused on appropriate repairing maintaining rehabilitating and if necessary retrofitting existing infrastructure with a view to extending its life and maximising its economic return **Concrete Repair, Rehabilitation and Retrofitting II** Mark G. Alexander, Hans-Dieter Beushausen, Frank Dehn, Pilate Moyo, 2008-11-13 The Second International Conference on Concrete Repair Rehabilitation and Retrofitting ICCRRR 2005 was held in Cape Town South Africa from 24 26 November 2008 The Conference followed the very successful First International Conference also in Cape Town in 2005 and continued as a collaborative venture by researchers from the South African Research Programme in Concrete Materials based at the Universities of Cape Town and The Witwatersrand and The Construction Materials Sections at Leipzig University and MFPA Leipzig in Germany The background in industry and the state of national infrastructures continues to be highly challenging and demanding The facts remain that much of our concrete infrastructure deteriorates at unacceptable rates that we need appropriate tools and techniques to undertake the vast task of sound repair maintenance and rehabilitation of such infrastructure and that all this must be undertaken with due cognisance of the limited budgets available for such work New ways need to be found to extend the useful life of concrete structures cost effectively Confidence in concrete as a viable construction material into the 21st century needs to be retained and sustained particularly considering the environmental challenges that the industry and society now face The conference proceedings contain papers presented at the conference and classified into a total of 12 sub themes which can be grouped under the three main themes

of i Concrete durability aspects ii Condition assessment of concrete structures and iii Concrete repair rehabilitation and retrofitting The major interests in terms of submissions exists in the fields of innovative materials for durable concrete construction integrated service life modelling of reinforced concrete structures NDE NDT and measurement techniques repair methods and materials and structural strengthening and retrofitting techniques The large number of high quality papers presented and the wide range of relevant topics covered confirm that these proceedings will be a valued reference for many working in the important fields of concrete durability and repair and that they will form a suitable base for discussion and provide suggestions for future development and research

Decision Based Design Vijitashwa Pandey,2013-08-26 In

a presentation that formalizes what makes up decision based design Decision Based Design defines the major concepts that go into product realization It presents all major concepts in design decision making in an integrated way and covers the fundamentals of decision analysis in engineering design It also trains engineers to understand the impacts of design decision The author teaches concepts in demand modeling and customer preference modeling and provides examples This book teaches most fundamental concepts encountered in engineering design like concept generation multiattribute decision analysis reliability engineering design optimization simulation and demand modeling The book provides the tools engineering practitioners and researchers need to first understand that engineering design is best viewed as a sequence of decisions made by the stakeholders involved and then apply the decision based design concepts in practice It teaches fundamental concepts encountered in engineering design such as concept generation multiattribute decision analysis reliability engineering design optimization simulation and demand modeling This book helps students and practitioners understand that there is a rigorous way to analyze engineering decisions taking into consideration all the potential technical and business impacts of their decisions It can be used in its entirety to teach a course in decision based design while selected chapters can also be used to cover courses in subdisciplines that make up decision based design
