Color and Culture John Gage, 1999 An encyclopaedic work on color in Western art and culture from the Middle Ages to Color and Culture John Gage, 1993 Gage looks at the use of color in civilization and art through different time periods and discusses such topics as the use of color to express sound and theories about color s source Culture John Gage, 1995 Colour is fundamental to life and art yet so diverse is it that it has hardly ever been studied in a comprehensive way Is it above all a visual stimulus A function of light or a material substance to be moulded and arrayed What does the language of colour tell us Where does one colour begin and another end Color and Meaning John Gage, 1999 John Gage's Color and Meaning is full of ideas He is one of the best writers on art now alive A S Byatt Booker A Cultural History of Color in the Medieval Age Carole P. Biggam, Kirsten Wolf, 2022-08-31 A Cultural Prize winner History of Color in the Medieval Age covers the period 500 to 1400 The medieval age saw an extraordinary burst of color from illuminated manuscripts and polychrome sculpture to architecture and interiors and from enamelled and jewelled metalwork to colored glass and the exquisite decoration of artefacts Color was used to denote affiliation in heraldry and social status in medieval clothes Color names were created in various languages and their resonance explored in poems romances epics and plays And whilst medieval philosophers began to explain the rainbow theologians and artists developed a color symbolism for both virtues and vices Color shapes an individual s experience of the world and also how society gives particular spaces objects and moments meaning The 6 volume set of the Cultural History of Color examines how color has been created traded used and interpreted over the last 5000 years. The themes covered in each volume are color philosophy and science color technology and trade power and identity religion and ritual body and clothing language and psychology literature and the performing arts art architecture and interiors and artefacts Carole P Biggam is Honorary Senior Research Fellow in English Language and Linguistics at the University of Glasgow UK Kirsten Wolf is Professor of Old Norse and Scandinavian Linguistics at the University of Wisconsin Madison USA Volume 2 in the Cultural History of Color set General Editors Carole P Biggam and Kirsten Wolf The Cultural Histories Series A Cultural History of Color is part of The Cultural Histories Series Titles are available as hardcover sets for libraries needing just one subject or preferring a tangible reference for their shelves or as part of a fully searchable digital library The digital product is available to institutions by annual subscription or on perpetual access via www bloomsburyculturalhistory com Individual volumes for academics and researchers interested in specific historical periods are also available in print or digitally via www bloomsburycollections com

The Nonsense of Kant and Lewis Carroll Ben-Ami Scharfstein, 2024-05-31 What if Immanuel Kant floated down from his transcendental heights straight through Alice's rabbit hole and into the fabulous world of Lewis Carroll For Ben Ami Scharfstein this is a wonderfully instructive scenario and the perfect way to begin this wide ranging collection of decades of startlingly synthesized thought Combining a deep knowledge of psychology cultural anthropology art history and the history

of religions not to mention philosophy he demonstrates again and again the unpredictability of writing and thought and how they can teach us about our experiences Scharfstein begins with essays on the nature of philosophy itself moving from an autobiographical account of the trials of being a comparativist to philosophy s function in the outside world to the fear of death in Kant and Hume From there he explores an impressive array of art from China and Japan to India and the West from an essay on sadistic and masochistic body art to one on the epistemology of the deaf and the blind He then returns to philosophy writing on Machiavelli and political ruthlessness then on the ineffable and closes with a review of Walter Kaufmann's multivolume look at the essence of humanity Discovering the Mind Altogether these essays are a testament to adventurous thought the kind that leaps to the furthest reaches of the possible Ordering Colours in 18th and Early 19th Century Europe Tanja C. Kleinwächter, Sarah Lowengard, Friedrich Steinle, 2023-10-04 This book describes the international effort to give order to colours and thus facilitate communication about it two topics deemed essential to a modernising world that were also recognizably complex Expert essays will enhance readers understanding of the struggle to coordinate nature with art at a time when approaches to both were undergoing rapid change Ordering Colours shows how such seemingly trivial concerns as identifying the basic colours and disseminating appropriate colour diagrams had to meet philosophical scientific and professional needs across Europe Contributors detail the many schemes for colour systematization and their real world applications questions of concern to both academic and manufacturing focused investigators throughout the long 18th century They bring together original research and new thinking about landmark early modern studies to address important developments as well as neglected historical contributions of European arts sciences and economies This collection is an important addition to the libraries of all who are interested in public culture and manufacturing developments in the early modern period and is aimed at historians of art technology philosophy and physics Colour in Art Iohn Gage, 2006 The complex phenomenon of colour has received detailed attention from the perspectives of physics chemistry physiology psychology linguistics and philosophy However the people who work most closely with colour artists have rarely been canvassed for their opinions on this mysterious subject Colour in Art is concerned with the history of colour but is not itself a history instead each chapter develops a theme from a different scientific discipline but seen from the viewpoint of artists such as Kandinsky Van Gogh and Anish Kapoor Flags synaesthesia Theosophy theatre design chromotherapy and chromophobia are among the many topics covered in this wide ranging and engaging introduction to the place and power of Monochrome Craig Staff, 2015-09-17 The monochrome a single colour of paint applied over the colour in life and art entirety of a canvas remains one of the more contentious modernist artistic inventions But whilst the manufacture of these pictures of nothing was ostensibly straightforward their subsequent theorisation has been anything but More than a history Monochrome Darkness and Light in Contemporary Art is the first account of the monochrome's lively role in contemporary art Liberated from the burden of representation the monochrome first stood for emancipation an ideological and artistic

impulse that characterised the avant garde of the early twentieth century Historically the monochrome embodied the most extreme form of abstraction and pure materiality Yet more recently adaptations of the art form have focused on a broader range of cultural and interpretive contexts Provocative innovative and timely this book argues that the latest artistic strategies go beyond stylistic concerns and instead seek to re engage with ideas around authorship process and the conditions of the visible as they are given and understood through both light and darkness Discussing works by artists such as Katie Paterson Hiroshi Sugimoto Tom Friedman Bruno Jakob Sherrie Levine and Ceal Floyer the book shows that the debates around an artwork s form and its possibility for meaning that the monochrome first engendered remain very much alive in contemporary visual culture On Light K.P. Clarke, Sarah Baccianti, 2014-12-30 The essays assembled in this new volume explore the fascination of the Middle Ages with the mystery of light and its central role in the period s thought and creativity Spanning medieval theology literature science and material culture the topics covered include the history of light and inseparably darkness as a literary figure from the Latin Bible to Geoffrey Chaucer theoretical speculations on colour sight and blindness and their unexpected fertilization of fields such as poetic imagery medieval preachers evocations of light as much more than merely figuring the moral and religious from St Simeon in the ninth century to John Fisher in the early sixteenth indeed the belief that light possessed not only reality but physical materality as manifested in artefacts such as the Gloucester Candlestick On Light thereby reveals not only the importance of this phenomenon to diverse aspects of medieval culture but profound and unremarked ways in which it helped to bind these into a whole **Generality Aspects of Color** Naming and Color Meaning Charles Taft, 1997 Color Chart Ann Temkin, 2008 Color Chart celebrates a paradox the lush beauty that results when contemporary artists assign colour decisions to chance readymade source or arbitrary system Midway through the 20th century long held convictions regarding the spiritual truth or scientific validity of particular colours gave way to an excitement about colour as a mass produced and standardized commercial product The Romantic quest for personal expression instead became Andy Warhol s I want to be a machine the artistry of mixing pigments was eclipsed by Frank Stella's Straight out of the can it can t get better than that This book and the exhibition it accompanies is the first devoted to this pivotal transformation and features work by some forty artists ranging from Ellsworth Kelly and Gerhard Richter to Sherrie Levine and Damien Hirst. Brilliant Effects Marcia R. Pointon, 2009 Pointon examines how small scale and valuable artefacts have figured in systems of belief and in political and social practice in Europe since the Renaissance

Sherman, 1997 **Observing Techniques** Nancy Anderson, 2002 Beyond Appearances? Sumathi Ramaswamy, 2003-04-25 Beyond Appearances provides a dynamic fourm for the main exponents of the anthropological turn in studies of South Asian popular visual culture and will prove an inspiration for a generation of emerging scholars The Journal of the Royal Anthropological Institute A striking feature of modern day society is the ubiquity of the visual or the image in everyday life Modernity seems to be marked by the hegemony of its vision with everything being measured by its ability to show or be shown But how does this linking of the visual to the modern stand up to scrutiny when placed within the contexts of the complicated picture worlds print complexes and image cultures of India This is the principal question that Beyond Appearances investigates The 11 essays in this book analyse the material and political work of a wide array of artefacts media and habits with the aim of understanding the principal contours of the visual practices and ideologies that distinguish an Indian modern Recognising the enormous power contained within images to transform and mobilise the self and the community the contributors focus on a variety of visual media including calendar art photography theatre popular cinema documentary films and propaganda videos maps and fine art In the process they also examine the intervisual dialogue between these diverse media exploring their underlying technologies of production and modalities of circulation and exchange The volume is also crucially concerned with understanding the role of visuality broadly understood as regimes of seeing and being seen in the constitution of national ethnic religious and community identities in modern India The contributors contended that visuality does not lie outside history culture or politics and that the visual is constitutive of both the social and the political Overall this volume draws attention to the fact that the visual can no longer be treated as a mere supplement to knowledge derived from written texts but constitutes a distinct field of enquiry Multi disciplinary comprehensive and informative this fascinating volume will be of interest to students and scholars in the fields of visual culture sociology anthropology art history political science and media studies **Medieval Optics and Theories of Light** in the Works of Dante Simon A. Gilson, 2000 This study investigates Dante s knowledge of several traditions of the extensive medieval literature on light and optics and examines how he assimilates and reworks related imagery themes and motifs in his writing
