- Computer Vision
- Computer Graphics - models that can be displayed on the screen.

e.g plotting a line on graph using points.

Formats of images → jpeg, bitmap, png.

For images, we have a file of images that consists of a matrix of values that specifies position of image & its colour.

image processing.

If we process images using models, we call it computer graphics.

eg:- representing boundary of mountain using curves which can be written in a mathematical way.

On Raising a Digital Human Norman I. Badler, 2024-09-20 This book tells the story of building digital virtual human models in the context of the background choices and occurrences that shaped the author's own involvement and personal evolution. Such digital models found motivating applications in engineering, anthropology, medical, and group simulation problems, and numerous connections to other disciplines informed and enriched their design, development, and deployment. This personal perspective on developments in the field is enhanced by extensive citations that provide pointers into relevant literature, recognize the contributions of co-authors and collaborators, and give external evidence for claims. Both academic and corporate interest in virtual beings has exploded in recent years, and while this book does not survey the current state of the art, it is an essential window into how the field arrived where it is today. The technical discussions throughout the book are deliberately accessible, with extensive references to the literature for further reading. This book will be of interest to readers who want to understand the history of virtual human beings, how they evolved, and especially how they must address numerous human characteristics to achieve any sense of human-ness.

Intelligent Data Engineering and Analytics Suresh Chandra Satapathy, Yu-Dong Zhang, Vikrant Bhateja, Ritanjali Majhi, 2020-08-29 This book gathers the proceedings of the 8th International Conference on Frontiers of Intelligent Computing Theory and Applications (FICTA 2020) held at NIT Surathkal, Karnataka, India, on 4-5 January 2020. In these proceedings, researchers, scientists, engineers, and practitioners share new ideas and lessons learned in the field of intelligent computing theories with prospective applications in various engineering disciplines. The respective papers cover broad areas of the information and decision sciences and explore both the theoretical and practical aspects of data-intensive computing, data mining, evolutionary computation, knowledge management, and networks, sensor networks, signal processing, wireless networks, protocols, and architectures. Given its scope, the book offers a valuable resource for graduate students in various engineering disciplines.

Modelling and Development of Intelligent Systems Dana Simian, Laura Florentina Stoica, 2020-01-16 This volume constitutes the refereed proceedings of the 6th International Conference on Modelling and Development of Intelligent Systems (MDIS 2019) held in Sibiu, Romania, in October 2019. The 13 revised full papers presented in the volume were carefully reviewed and selected from 31 submissions. The papers are organized in topical sections on adaptive systems, conceptual modelling, data mining, intelligent systems for decision support, machine learning.

Computational Linguistics, Speech And Image Processing For Arabic Language Neamat El Gayar, Ching Yee Suen, 2018-09-18 This book encompasses a collection of topics covering recent advances that are important to the Arabic language in areas of natural language processing, speech, and image analysis. This book presents state-of-the-art reviews and fundamentals as well as applications and recent innovations. The book chapters, by top researchers, present basic concepts and challenges for the Arabic language in linguistic processing, handwritten recognition, document analysis, text classification, and speech processing. In addition, it reports on selected applications in sentiment analysis.

annotation text summarization speech and font analysis word recognition and spotting and question answering Moreover it highlights and introduces some novel applications in vital areas for the Arabic language The book is therefore a useful resource for young researchers who are interested in the Arabic language and are still developing their fundamentals and skills in this area It is also interesting for scientists who wish to keep track of the most recent research directions and advances in this area

Recognition of Whiteboard Notes Marcus Liwicki, Horst Bunke, 2008 This book addresses the task of processing online handwritten notes acquired from an electronic whiteboard which is a new modality in handwriting recognition research The main motivation of this book is smart meeting rooms aim to automate standard tasks usually performed by humans in a meeting The book can be summarized as follows A new online handwritten database is compiled and four handwriting recognition systems are developed Moreover novel preprocessing and normalization strategies are designed especially for whiteboard notes and a new neural network based recognizer is applied Commercial recognition systems are included in a multiple classifier system The experimental results on the test set show a highly significant improvement of the recognition performance to more than 86%
