

Concepts of ideology

Ideology is a basic starting point for almost all contemporary cultural theory.

Ideology refers to the basic ideas and assumptions that help shape a given culture, the preconceived notions and beliefs that structure a given society (as well as its individual members). Ideological beliefs are usually taken as naturally and inherently true by the people, groups, and institutions that hold them. As such, ideology is inherent in all **cultural artifacts**, or **texts**, but it is also something of a free-floating structure that pervades all aspects of culture. If **culture** can be said to consist of the material goods, products, and behaviors of any group of people, ideology is the invisible glue that binds those various objects and behaviors into a coherent and meaningful system of shared relatable experiences. Cultural artifacts always convey ideologies, whether they are consciously encoded into them by their producers or not, and whether their consumers are aware of them or not. Thus, one of the main goals of ideological analysis is to learn to recognize and be able to identify the various ideologies that cultural artifacts convey. And as complex amalgamations of sound and vision, film and television texts can and do convey ideologies in complex and multiple ways. Ideologies are expressed in the ways that stories are told (narrative design), how sets are constructed and lit, how roles are embodied by actors, and how lighting, sound, music, and camera work are deployed. The ideological analysis of a film or TV show therefore often begins with its formal properties, even as it might also encompass a consideration of its means of production (i.e. who made it, for what reasons, and within what socio-historical and industrial contexts).

Ideological analysis immediately asserts that art and culture—indeed all cultural artifacts—have a political dimension. As such, film and television contribute to our understandings of the world around us and the issues we face: film and television texts are part of larger cultural struggles for meaning and understanding. To give one basic historical example, if film and television texts only depict African Americans as butlers and maids (as they mostly did for many decades), those images are going to contribute to a very limited and limiting understanding of African Americans. White viewers might thank (either consciously or unconsciously) that those images represent the totality of African American experience, while African American viewers may internalize such messages (consciously or unconsciously) and limit their own lives accordingly. As this one example postulates, the cumulative effects of media images can and do shape how the “real world” understands itself. And those understandings have “real world” consequences in the way that laws are written and passed, and in the basic ways that human beings treat the world around them, including other human beings.

In the mainstream press, ideology is sometimes used to refer to one’s political
