Straight A's Are Not Enough is a research based book on study skills for college students but it is NOT another book on how to make Straight A's. This book is based on the belief that learning is more important than grades. Students using these strategies should still be able to make the grades they want and need while getting a great education. While the book is written for college students it is also appropriate for high school students taking advanced courses or preparing for college. There are stories, a wide variety of visual comic strips and over one hundred practical strategies. The last section of the book includes What Employers Want, Most Critical Thinking, Analytical Reasoning and Problem Solving. The book includes many original ideas such as Flexible Time Management, The Never Cram Method of Test Preparation and the definition of study as Mental Processing. Too many students think that reading the chapter or rereading the chapter is studying. Mental Processing or study is what students do after they finish reading. It includes organizing information both verbally and visually and using some of the ten ways of thinking and ten pathways to memory. The book begins with the question Why do students work hard, make good grades but quickly forget what they learned. It also raised two related questions: How can students learn more, understand deeply and remember longer, and How can students get the great education they want and need. The conclusion answers these questions based on a great deal of recent research. Students may be surprised to learn that nearly all of the strategies that they commonly use are among the least effective strategies. The most effective strategies are rarely used.

How to Be Successful in College: a New Perspective on How to Be a Straight-A student Tegegne Shiferaw, 2018-06-20. We are living in a time when the media and the know it all media personnel advise us not to go to college. Luck and a natural gift of God put these people where they are right now. Yet they attribute their success to not going to college. And when you look closer they are sending their kids to the best schools they know of. They want you not to go to school. Who is gonna read their garbage. Who is going to sweat in their growing businesses. They need hands and legs for their startups. Why would you do that when you can be a brain of your own. Don't let them convince you otherwise. The principles of the good old days are still practical and true. These people keep your hopes up for nothing. And before you know it all those beautiful images they draw will be shattered. Brother unless you are born with a gold spoon don't make going to college a plan B. And the last time I check the children of well to do families graduate from the best colleges equivalent to scoring the best grades in an ordinary college. Yes College is not a Plan B. College is not optional. I know it is not easy. And it is costly. And it is time consuming. Yet none of these are powerful enough to decide otherwise. Get back to school. And once in school be the best one. The best athletes take the trophies. And don't doubt what I say. I was the best student both in high school and college. I was a lecturer professor too. I have my own secrets to academic success. And I know the secrets of a whole lot of students, teachers and classmates. If you can decide in going to college leave the rest to me. I will help you to get your As. If you have nothing at hand, nothing to lose, this will be the best time to be in college. In fact you lose a lot if you are not college. When you graduate you don't just go away with your grade reports. There are trillion things you learn of which some have no price tag. These are the
