*New Grove* This volume brings together fourteen shorter essays from various journals and symposia both British and  
American that are often hard to find and may be less familiar to many scholars and students in the field Here we have studies

of how singing in church strayed from artistic control during its neglect in the 16th and 17th centuries how the vernacular fusing tune of West Gallery choirs grew up and how individuals like Playford Croft Madan and Stainer set about raising artistic standards There are also assessments of the part played by charity in the improvement of church music the effect of the English organ and the reasons why it never inspired anything resembling the German organ chorale and the origins of congregational psalm chanting in late Georgian York Whatever the topic Temperley takes a fresh approach based on careful research while refusing to adopt artistic or religious preconceptions
