everyone By forcing data hoarding companies to open access to their data we can reinvigorate both our economy and our society Authors Viktor Mayer Sch nberger and Thomas Ramge contend that if we disrupt monopoly power and create a level playing field digital innovations can emerge to benefit us all Over the past twenty years Big Tech has managed to centralize the most relevant data on their servers as data has become the most important raw material for innovation However dominant oligopolists like Facebook Amazon and Google in contrast with their reputation as digital pioneers are actually slowing down innovation and progress by withholding data for the benefit of their shareholders at the expense of customers the economy and society As Access Rules compellingly argues ultimately it is up to us to force information giants wherever they are located to open their treasure troves of data to others In order for us to limit global warming contain a virus like COVID 19 or successfully fight poverty everyone including citizens and scientists start ups and established companies as well as the public sector and NGOs must have access to data When everyone has access to the informational riches of the data age the nature of digital power will change Information technology will find its way back to its original purpose empowering all of us to use information so we can thrive as individuals and as societies *Trillion Dollar Coach* Eric Schmidt,Jonathan Rosenberg,Alan Eagle,2019-04-16 1 Wall Street Journal Bestseller New York Times Bestseller USA Today Bestseller The team behind How Google Works returns with management lessons from legendary coach and business executive Bill Campbell whose mentoring of some of our most successful modern entrepreneurs has helped create well over a trillion dollars in market value Bill Campbell played an instrumental role in the growth of several prominent companies such as Google Apple and Intuit fostering deep relationships with Silicon Valley visionaries including Steve Jobs Larry Page and Eric Schmidt In addition this business genius mentored dozens of other important leaders on both coasts from entrepreneurs to venture capitalists to educators to football players leaving behind a legacy of growing companies successful people respect friendship and love after his death in 2016 Leaders at Google for over a decade Eric Schmidt Jonathan Rosenberg and Alan Eagle experienced firsthand how the man fondly known as Coach Bill built trusting relationships fostered personal growth even in those at the pinnacle of their careers inspired courage and identified and resolved simmering tensions that inevitably arise in fast moving environments To honor their mentor and inspire and teach future generations they have codified his wisdom in this essential guide Based on interviews with over eighty people who knew and loved Bill Campbell *Trillion Dollar Coach* explains the Coach s principles and illustrates them with stories from the many great people and companies with which he worked The result is a blueprint for forward thinking business leaders and managers that will help them create higher performing and faster moving cultures teams and companies **Life After Google** George Gilder,2018-07-17 A FINANCIAL TIMES BOOK OF THE MONTH FROM THE WALL STREET JOURNAL Nothing Mr Gilder says or writes is ever delivered at anything less than the fullest philosophical decibel Mr Gilder sounds less like a tech guru than a poet and his words tumble out in a romantic cascade Google s algorithms assume the world s future is nothing more than the next moment in a random

process George Gilder shows how deep this assumption goes what motivates people to make it and why it's wrong the future depends on human action Peter Thiel founder of PayPal and Palantir Technologies and author of Zero to One Notes on Startups or How to Build the Future The Age of Google built on big data and machine intelligence has been an awesome era But it's coming to an end In Life after Google George Gilder the peerless visionary of technology and culture explains why Silicon Valley is suffering a nervous breakdown and what to expect as the post Google age dawns Google's astonishing ability to search and sort attracts the entire world to its search engine and countless other goodies videos maps email calendars And everything it offers is free or so it seems Instead of paying directly users submit to advertising The system of aggregate and advertise works for a while if you control an empire of data centers but a market without prices strangles entrepreneurship and turns the Internet into a wasteland of ads The crisis is not just economic Even as advances in artificial intelligence induce delusions of omnipotence and transcendence Silicon Valley has pretty much given up on security The Internet firewalls supposedly protecting all those passwords and personal information have proved hopelessly permeable The crisis cannot be solved within the current computer and network architecture The future lies with the cryptocosm the new architecture of the blockchain and its derivatives Enabling cryptocurrencies such as bitcoin and ether NEO and Hashgraph it will provide the Internet a secure global payments system ending the aggregate and advertise Age of Google Silicon Valley long dominated by a few giants faces a great unbundling which will disperse computer power and commerce and transform the economy and the Internet Life after Google is almost here For fans of Wealth and Poverty Knowledge and Power and The Scandal of Money
