Get External Data - Text File

Select the source and destination of the data

Specify the source of the definition of the objects.

File name: C:\Users\Fred\Documents\artists.csvBrowse...

Specify how and where you want to store the data in the current database.

☐ Import the source data into a new table in the current database.

If the specified table does not exist, Access will create it. If the specified table already exists, Access might overwrite its contents with the imported data. Changes made to the source data will not be reflected in the database.

☒ Append a copy of the records to the table: Artists

If the specified table exists, Access will add the records to the table. If the table does not exist, Access will create it. Changes made to the source data will not be reflected in the database.

☐ Link to the data source by creating a linked table.

Access will create a table that will maintain a link to the source data. You cannot change or delete data that is linked to a text file. However, you can add new records.
