IBM Sterling B2B Integrator for B2B Collaboration

*IBM gives you improve control beyond the edge of
your enterprise*

Executive summary

An increasingly competitive global marketplace is driving businesses to adapt their corporate strategies and tactics faster than ever. IT systems that can not only cope with these changes but actually accelerate their adoption will become increasingly valuable in today's dynamic business environment. IBM® Sterling B2B Integrator makes it faster and easier to build, deploy and manage B2B solutions across diverse business partner communities. Sterling B2B Integrator is a component of IBM Connectivity and Integration.

Grow beyond the edge

Business leaders recognize that today's opportunities for profitable growth lie at the edge of the enterprise, where your organization makes contact with its community of business partners. After years of investing to build up your internal IT infrastructure, it is time for you to complete the picture by extending and integrating your existing infrastructure into the expanded value chain outside your enterprise. The ability to capitalize on this new growth opportunity is what distinguishes winners from mere survivors in the highly competitive and rapidly evolving global economy.

But how do you enhance your reach, vision and control at – and beyond – the edge of your enterprise?

Diversity is the reality

Today, almost every business operates in a complex business environment within an extended value chain, composed of customers, suppliers, partners, distributors and even competitors. Among all of the challenges you face in this demanding situation, diversity is one of the toughest and most persistent. In the B2B world, businesses are constantly facing roadblocks from partner diversity, system diversity, standards diversity and geographical/cultural diversity.

Prioritizing Employee Mental Health and Well-Being for Organizational Success

Wongmahesak, Kittisak, Marzo, Roy Rillera, Ghosh, Uday Kumar, 2025-04-30 Prioritizing employee mental health and well being has become fundamental for organizational success in today's dynamic work environment. As businesses recognize the direct link between a supportive work culture and employee productivity, engagement and retention, mental health initiatives are essential. Creating a work environment that promotes mental well being involves offering resources such as access to counseling services, stress management programs and fostering a healthy work life balance. By investing in mental health support, businesses improve the overall well being of their workforce and enhance creativity, collaboration and morale. Organizations that proactively address these concerns position themselves as choice employers demonstrating a commitment to the success of their workforce. *Prioritizing Employee Mental Health and Well Being for Organizational Success* explores the crucial link between employee well being and organizational success, moving beyond simple correlation to examine the complex mechanisms driving this relationship. It features contributions from leading researchers and practitioners across organizational psychology, human resources and business sustainability, offering diverse perspectives on workplace stress, well being initiatives, leadership's role in fostering supportive environments and the long term financial benefits of prioritizing employee mental health. This book covers topics such as employee wellbeing, data privacy and psychology and is a useful resource for business owners, computer engineers, psychologists, academicians, researchers and scientists.

End-to-end Integration with IBM Sterling B2B Integration and Managed File Transfer Solutions James Ballentine, Claudemir Braghirolli, Vasfi Gucer, Rahul Gupta, James Herry, Richard Kinard, Gianluca Meloni, Bala Sivasubramanian, Eduardo De Souza, Frank Strecker, Gang Yin, 2012 Across numerous vertical industries, enterprises are challenged to improve processing efficiency as transactions flow from their business communities to their internal systems and vice versa. Simplify management and expansion of the external communities, accommodate customer and supplier preferences, govern the flow of information, enforce policy and standards and protect sensitive information. Throughout this process, external partners must be on boarded and off boarded, information must flow across multiple communications infrastructures and data must be mapped and transformed for consumption across multiple applications. Some transactions require synchronous or real time processing while others are of a more periodic nature. For some classes of customer or supplier, the enterprise might prefer a locally managed on premise solution. For some types of communities, often small businesses, an as a Service solution might be the best option. Many large enterprises combine the on premise and as a Service approach to serve different categories of business partners, customers or suppliers. This IBM Redbooks publication focuses on solutions for end to end integration in complex value chains and presents several end to end common integration scenarios with IBM Sterling and IBM WebSphere portfolios. We believe that this publication will be a reference for IT Specialists and IT Architects implementing an integration solution architecture involving IBM Sterling and IBM WebSphere portfolios.
