Iesna Lighting Handbook 10th Edition :

Lighting Retrofit and Relighting James R. Benya, Donna J. Leban, 2011-03-08 The ultimate guide to the retrofitting of lighting for greater efficiency and performance Retrofitting outdated energy guzzling lighting components with green energy saving alternatives is a process that promotes sustainability and offers significant benefits for businesses contractors and the community at large Not only can retrofitting improve the overall quality and functionality of light it also can make spaces safer easier and less costly to maintain and more comfortable to inhabit From lighting technology to retrofit financial analysis Lighting Retrofit and Relighting evaluates the latest lighting system types then demonstrates how to apply them for the greatest functional and cost saving benefit This book Discusses the recent advances in lighting equipment and retrofittable controls for both interior and outdoor use Explains how to do a lighting audit to identify and evaluate logical retrofit choices Includes case studies of retrofits illustrating improvements in the quality and efficacy of new lighting Demonstrates how cost savings realized over time can not only pay for new equipment but produce a return on the investment Lighting Retrofit and Relighting serves as an ideal reference for students or professionals whether they are energy auditors designers installers facilities managers or manufacturers by taking a close look at the most current lighting technology illuminating pathways toward a brighter future

The Lighting Handbook David L. DiLaura, Illuminating Engineering Society of North America, 2011 The IES Lighting Handbook is an indispensable reference for anyone involved in lighting including practitioners designers architects and engineers It is a compendium of what is known that directly relates to lighting and lighting design This new edition provides a new illuminance determination procedure consisting of visual age based illuminance ranges and mesopic adaptation Much information is conveniently summarized in tabular format and exemplified with numerous four color photographs and illustrations There is in depth coverage of sustainability practices new chapters on daylighting controls sustainability commissioning and energy management

Heating, Cooling, Lighting Norbert Lechner, 2014-10-13 Sustainable environmental control through building design Heating Cooling and Lighting is the industry standard text on environmental control systems with the emphasis on sustainable design By detailing the many factors that contribute to the comfort in a building this book helps architects minimize mechanical systems and energy usage over the life of the building by siting building design and landscaping to maximize natural heating cooling and lighting This new fourth edition includes new information on integrated design strategies and designing for the Tropics Resources include helpful case studies checklists diagrams and a companion website featuring additional cases an image bank and instructor materials Designing buildings that require less energy to heat cool and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems Basic design decisions regarding size orientation and form have a great impact on the sustainability cost and comfort of a building Heating Cooling and Lighting provides detailed guidance for each phase of a design project Readers will Understand the concept of sustainability as applied to energy sources Review

the basic principles of thermal comfort and the critical role of climate Learn the fundamentals of solar responsive design including active and passive solar systems as well as photovoltaics Discover how siting architectural design and landscaping can reduce the requirements for mechanical and electrical systems In sustainable design mechanical and electrical systems should be used to only accomplish what the architect could not by the design of the building itself With this in mind designers require a comprehensive understanding of both the properties of energy and the human factors involved in thermal comfort Heating Cooling and Lighting is the complete industry leading resource for designers interested in sustainable environmental control

Quality Lighting for High Performance Buildings Michael Stiller, 2020-12-17 This book provides an overview of the basic concepts of quality indoor lighting and explains concepts like visual comfort visual interest and integrated design as they relate to the practice of lighting design Energy efficient lighting technologies including LED lighting and digital control systems and design strategies that increase visual comfort and productivity are discussed in plain language and examined in a straightforward way to give the reader whether an architect interior designer engineer building trades professional or student a broad understanding of the art and science of energy efficient quality lighting

Mechanical and Electrical Equipment for Buildings Walter T. Grondzik, Alison G. Kwok, 2014-10-06 The definitive guide to environmental control systems updated with emerging technology and trends The Interactive Resource Center is an online learning environment where instructors and students can access the tools they need to make efficient use of their time while reinforcing and assessing their understanding of key concepts for successful understanding of the course An access card with redemption code for the online Interactive Resource Center is included with all new print copies or can be purchased separately If you rent or purchase a used book with an access code the access code may have been redeemed previously and you may have to purchase a new access code ISBN 978111899616 4 The online Interactive Resource Center contains resources tied to the book such as Interactive Animations Interactive Self tests Interactive Flashcards Case Studies Respondus Testbank instructors only Instructor s Manual over 200 pages including additional resources Instructors only Roadmap to the 12th Edition Instructors only Student Guide to the Textbook Mechanical and Electrical Equipment for Buildings Twelfth Edition is the industry standard reference that comprehensively covers all aspects of building systems With over 2 200 drawings and photographs the book discusses basic theory preliminary building design guidelines and detailed design procedure for buildings of all sizes The updated twelfth edition includes over 300 new illustrations plus information on the latest design trends codes and technologies while the companion website offers new interactive features including animations additional case studies quizzes and more Environmental control systems are the components of a building that keep occupants comfortable and help make the building work Mechanical and Electrical Equipment for Buildings covers both active controls like air conditioners and heaters as well as passive controls like daylighting and natural ventilation Because these systems comprise the entire energy use and costs of a building s life the book stresses the importance of sustainability considerations

during the design process by both architects and builders Authored by two leading green design educators MEEB provides the most current information on low energy architecture including topics like Context comfort and environmental resources Indoor air quality and thermal control Illumination acoustics and electricity Fire protection signal systems and transportation Occupant comfort and building usability are the most critical factors in the success of a building design and with environmental concerns mounting it s becoming more and more important to approach projects from a sustainable perspective from the very beginning As the definitive guide to environmental control systems for over 75 years Mechanical and Electrical Equipment for Buildings is a complete resource for students and professionals alike

Stage Lighting

Richard E Dunham,2018-12-07 Stage Lighting Design Applications and More builds upon the information introduced in Stage Lighting The Fundamentals to provide an in depth reference to a number of specialty areas of lighting design from traditional applications such as drama dance and designing for different venues to more advanced applications such as concert corporate film and video virtual architectural landscape and other forms of entertainment lighting Each chapter gives the essential background design practices and equipment details for each specialization so readers can make informed decisions and ask informed questions when encountering each field The book provides insight on the latest technology and includes profiles of prolific designers such as James Moody Jeff Ravitz Alan Adelman and Paul Gregory Stage Lighting Design Applications and More is intended to help lighting designers translate their theatrical skills to other areas of lighting design and provides guidance on how to take those initial steps into new ventures in their lighting careers
