

Project Scheduling Steps

Develop the WBS -

A WBS is sort of like a step by step process for accomplishing the goals set out in the project plan

Define tasks and logic -

In this step, the work to be done is further broken down into individual tasks

Estimate task duration -

The duration of each task is estimated, which gives the total project length

Define resources -

Resources can be things like materials or software. One of the most important resources is the project teams' time

Analyze the schedule -

Some of the most important tools available to a project manager are project scheduling techniques

Project Planning, Scheduling, and Control in Construction Calin M. Popescu, Chotchai Charoenngam, 1995-03-20 Critical
Path Method CPM and Performance Evaluation and Review Technique PERT are widely recognized as the most
effective methods of keeping large complex construction projects on schedule under budget and up to professional standards
But these methods remain underused because they are poorly understood and due to a host of unfamiliar terms and
applications may seem more complicated than they really are This encyclopedia brings together in one comprehensive volume
all terms definitions and applications related to the time and cost management of construction projects While many of these
terms refer to ancient and venerable building practices others have evolved quite recently and refer specifically to
modern construction and management techniques Sources include hundreds of professional books trade journals and research
publications as well as planning and scheduling software vendor literature The detailed glossary of all applicable terms
includes across referenced listing of examples that describe real world applications for each term supplied An extensive
bibliography covers all applicable books articles and periodicals available on project planning scheduling and control using
CPM and related subjects This book is an important quick reference and desktop information resource for construction
planners schedulers and controllers as well as civil engineers and project managers It is also the ultimate research tool for
educators students or anyone who seeks to improve their understanding of the management of modern construction projects
