know how to be good students. Instructors often don't have the time, the resources, or the expertise to teach success skills AND the math concepts. The new team of Messersmith, Perez, and Feldman offer a scientifically based approach to meet this challenge. The P O W E R Learning Framework was developed by successful author, psychologist, student success instructor, and researcher Bob Feldman. It is a method of accomplishing any task using five simple and consistent steps: Prepare, Organize, Work, Evaluate, Rethink. This framework is integrated at every level of the text to help students successfully learn math concepts while at the same time developing habits that will serve them well throughout their college careers and in their daily lives. The Math Mastering Concepts, with the textbook and Connect Math hosted by ALEKS, students can practice and master their understanding of algebraic concepts. Messersmith is rigorous enough to prepare students for the next level yet easy to read and understand. The exposition is written as if a professor is teaching in a lecture to be more accessible to students. The language is mathematically sound yet easy enough for students to understand.
