Bravo! Your Preface statement GenAI has created an ultra high level programming capability that will leverage your Java learning experience and ability to produce robust top quality Java software quickly, conveniently, and economically is a great conclusion to the Preface. The intro really helps justify the use of GenAI. Brian Canada, Professor of Computational Science, University of South Carolina Beaufort. After reading your whole book, it was fun to read the Preface that wraps everything up at a high level. You have done some amazing work here, and I'm glad to have been a small part of it as a reviewer. I especially appreciate how difficult it must have been to make sure everything was as up to date as possible with the speed at which things change in this field and the deftness with which you incorporated all the focus on GenAI and data science that's in this book. Emily Navarro, Ph.D., Continuing Lecturer, Department of Informatics, University of California Irvine. The generative AI exercises are awesome and reflect the way modern developers work. They are fun and let the reader explore and learn about AI by using AI how meta. This allows readers to expand their knowledge and get a feel for the AI's code-related capabilities. Cardano for the Masses John Greene, 2022-07-04 Updated January 2024. ADA is a native cryptocurrency that runs on Cardano, a third generation decentralized public blockchain that aims to protect user privacy while remaining flexible for regulation. Cardano is spearheaded by Charles Hoskinson, who began in crypto with his course Bitcoin or How I Learned to Stop Worrying and Love Crypto. He subsequently went on to be a co-founder of BitShares and Ethereum before co-founding Cardano in 2015. Cardano is named after Gerolamo Cardano, an influential mathematician in the Renaissance. The platform aims to solve three issues with traditional cryptocurrencies: Sustainability, Scalability, Interoperability. This book is mainly for Cardano newcomers. It does not go deep into the weeds of the technical research papers nor explore concepts in great detail. The goal is to give a broad overview of Cardano with explainers from Everipedia and Charles Hoskinson quotes where relevant. This is a super impressive piece of work on Cardano from John Greene. Congratulations! And thank you. Every self-respecting Kindle or bookshelf needs to sport one this summer. Tim Harrison, IOG VP Community Ecosystem Communications. This is the Bible of Cardano. Kristian Portz, NMKR COO. I love this book and you will too. Jason Appleton, Crypto Crow. Thanks for making my dreams available to the masses. Charles Hoskinson, IOG CEO Founder.
