**FOR BUSINESS INTELLIGENCE:** Galit Shmueli,Nitin R Patel,Peter C Bruce,2008-09 Market\_Desc As a textbook or  
 supplement for courses in data mining data warehousing business intelligence and or decision support systems at the upper  
 undergraduate or beginning graduate MS Ph D or MBA levels in departments of mathematics and statistics computer science  
 information technology engineering or business as a reference guide for professionals in related fields Special Features The  
 book s greatest strength lies in its presentation of hands on business oriented applications complete with real data sets and  
 cases The chapters have been written with flexibility in mind so the user and or instructor can navigate throughout the book  
 as he or she chooses The excellent mix between mathematical rigor and readability make the book ideal for multiple  
 readerships The software system of choice XLMiner™ is a familiar and easy to use tool for business analysts consultants and  
 students since it is based on the popular Excel spreadsheet concept It provides a comprehensive set of data mining models  
 and algorithms that includes statistical machine learning and database methods at no additional cost to the purchaser There  
 are plentiful exercises and examples to motivate learning and understanding About The Book This book arose out of a data  
 mining course at MIT s Sloan School of Management Preparation for the course revealed that there are a number of excellent  
 books on the business context of data mining but their coverage of the statistical and machine learning algorithms and  
 theoretical underpinnings is not sufficiently detailed to provide a practical guide for users who possess the raw skills and  
 tools to analyze data This book is intended for the business student and practitioner of data mining techniques and the goal is  
 threefold 1 to provide both a theoretical and practical understanding of the key methods of classification prediction reduction  
 and exploration that are at the heart of data mining 2 to provide a business decision making context for these methods and 3  
 using real business cases and data to illustrate the application and interpretation of these methods The book employs the use  
 of an Excel add in XLMiner™ at no cost to registered instructors in order to illustrate and interpret the various data sets  
 that are presented throughout Real life business cases are also presented so that readers can implement algorithms with a  
 very low learning hurdle     *Contemporary Mktng 1999 Ed Tb* Boone,2000-06     **Financial Mail** ,2006-11     **ITB**
