Programming is an online learning system designed to engage students and improve results. MyLab Programming consists of a set of programming exercises correlated to the programming concepts in this book. Through hundreds of practice problems, the system automatically detects errors in the logic and syntax of their code submissions and offers targeted hints that enable students to figure out what went wrong and why. MyLab Programming improves the programming competence of beginning students who often struggle with the basic concepts and paradigms of popular high-level programming languages. For instructors, a comprehensive gradebook tracks correct and incorrect answers and stores the code inputted by students for review. Note: You are purchasing a standalone product. MyLab Mastering does not come packaged with this content. Students, if interested in purchasing this title with MyLab Mastering, ask your instructor for the correct package ISBN and Course ID. Instructors contact your Pearson representative for more information. *Java, Late Objects Version* Paul J. Deitel, Harvey M. Deitel, 2010. The Deitels' groundbreaking *How to Program* series offers unparalleled breadth and depth of object-oriented programming concepts and intermediate-level topics for further study. This survey of Java programming contains an optional extensive OOD UML 2 case study on developing and implementing the software for an automated teller machine. The Eighth Edition of this acclaimed text is now current with the Java SE 6 updates that have occurred since the book was last published. The *Late Objects Version* delays coverage of class development until Chapter 8, presenting the control structures, methods, and arrays material in a non-object-oriented procedural programming context.
