containing future downside risks This trade off may be amplified by the existing high and rapidly building leverage increasing downside risks to future growth The appropriate timing for deployment of macroprudential tools should be country specific depending on the pace of recovery vulnerabilities and policy tools available Chapter 3 turns to the impact of the COVID 19 crisis on the commercial real estate sector While there is little evidence of large price misalignments at the onset of the pandemic signs of overvaluation have now emerged in some economies Misalignments in commercial real estate prices especially if they interact with other vulnerabilities increase downside risks to future growth due to the possibility of sharp price corrections
