Reshaping Society through Analytics, Collaboration, and Decision Support Lakshmi S. Iyer, Daniel J. Power, 2014-12-04 This volume explores emerging research and pedagogy in analytics collaboration and decision support with an emphasis on business intelligence and social media In general the chapters help understand where technology involvement in human decisions is headed Reading the chapters can help understand the opportunities and threats associated with the use of information technology in decision making Computing and information technologies are reshaping our global society but they can potentially reshape it in negative as well as positive ways Analytics collaboration and computerized decision support are powerful decision aiding and decision making tools that have enormous potential to impact crisis decision making regulation of financial systems healthcare decision making and many more important decision domains Many information technologies can potentially support assist and even decide for human decision makers Despite the potential some researchers think that we know the answers to how these technologies will change society The Wisdom of Crowds or Big Data become the topic of the day and are soon replaced with new marketing terms In many ways mobile technology is just another form factor to adapt decision support capabilities too and experiment with new capabilities The cloud is a nebulous metaphor that adds to the mystery of information technology Wireless technology enables the ubiquitous presence of analytics and decision support With new networking capabilities collaboration is possible anywhere and everywhere using voice video and text Documents can be widely shared and massive numbers of documents can be carried on a small tablet computer Recent developments in technologies impact the processes organizations use to make decisions In addition academics are looking for ways to enhance their pedagogy to train students to be more adept in understanding how emerging technology will be used effectively for decision making in organizations The chapters are based on papers originally reviewed at the Special Interest Group on Decision Support Systems SIGDSS Workshop at the 2013 International Conference on Information Systems ICIS 2013 Ultimately this volume endeavors to find a balance between systematizing what we know so we can teach our findings from prior research better and stimulating excitement to move the field in new directions

Bridging the Socio-technical Gap in Decision Support Systems Ana Respício, 2010 The socio technical gap is the great divide between social activities such as coordination which researchers and practitioners aim to support and those that are actually supported by technology As the social interaction takes place through technology it is changed and mediated by the technology This gap between the two dimensions is being challenged by new and innovative approaches such as cognitive ergonomics and Web 2 0 3 0 Research in Decision Making DM theory and Decision Support Systems DSS shows that this gap is due in part to technical limitations and in part to the complexity of the contexts where decision support must be provided Thus DSS researchers face important questions concerned with the encapsulation of complex social aspects of managerial decision making as well as with the representation of key human cognitive mechanisms such as

intuition and insight within computational systems This book presents the latest innovations and advances in decision support theory and practice with a special focus on bridging the socio technical gap These achievements will be of interest to all those involved in decision making activities and research The book covers a wide range of topics including Understanding DM Design of DSS Web 2 0 Systems in Decision Support Business Intelligence and Data Warehousing Applications of Multi Criteria Decision Analysis Intelligent DM Context in DM Knowledge Management ERP Systems Decision Support for Policy Making Decision Making in Emergency Scenarios Decision Support in Commerce and Decision Support for Production Planning
