Lipták,Kriszta Venczel,2016-11-25 This handbook is dedicated to the next generation of automation engineers working in the fields of measurement control and safety describing the sensors and detectors used in the measurement of process variables Busy Is a Four-Letter Word Kishshana Palmer,2025-12-02 Improve your productivity take a more enjoyable approach to life and amplify your leadership Using a human centered approach Busy Is a Four Letter Word looks at the essential relationship between living well and leading well aiming to end the self gratifying martyrdom of busy culture and working to uncomplicate personal and professional prosperity By highlighting topics such as real self care rest wellness and saying no as indispensable to success and productivity the powerful 5 step ReThink Method in Busy Is a Four Letter Word helps readers get more out of life while also being more productive in their pursuits In this book you ll learn How to stop piling on to your to do list and instead take bite sized actions that will shift turn and restart the next professional or personal season of your life The idea of martyritis consistently taking actions that leave you feeling overwhelmed overworked and underappreciated as your default state of being How to create your 5 Star wellness plan to help you rethink your work ethic and create new patterns and rituals routines that allow you to get the most out of life and to thrive while doing less With Busy Is a Four Letter Word and Palmer s highly effective ReThink Method at your fingertips leaders and team members alike can find ways to get more done by rethinking their approach to work and life Wrecking Ball Stu Woolman,2021-04-29 Wrecking Ball explores in an unprecedented manner a decalogue of wicked problems that confronts humanity Nuclear proliferation climate change pandemics permanent technological unemployment Orwellian public and private surveillance social media that distorts reality cyberwarfare the fragmentation of democracies the inability of nations to cabin private power the failure of multinational institutions to promote collaboration and the deepening of autocratic rule in countries that have never known anything but extractive institutions Collectively or even severally these wicked problems constitute crises that could end civilisation Does this list frighten you or do you blithely assume that tomorrow will be just like yesterday Wrecking Ball shows that without an inclusive system of global governance the collective action required to solve those wicked problems falls beyond the remit of the world s 20 inclusive democracies 50 flawed democracies and 130 extractive elitist autocracies Flawed democracies and autocracies that already struggle to produce goods necessary for their own citizens to flourish are simply incapable of committing to international arrangements that address the existential threats posed by the decalogue of wicked problems This then is our children s inheritance Dystopias far far worse than the polities that we ourselves have known What if anything can mitigate the harms that are our legacy Wrecking Ball offers as an answer a ground breaking

analysis of South Africa's political economy. It demonstrates that this country's elitist and extractive political and economic institutions not only make resolution of ongoing domestic crises unattainable, likewise they make meaningful responses to wicked problems impossible. Smart people think they have all the answers. Without laboring under any such illusions, Martin Luther King Jr. eloquently opined, 'The arc of the moral universe is long but it bends towards justice.' But what will happen, King would acidly ask, if we continue to dawdle and simply run out of time? Wrecking Ball similarly operates under no such smart pretenses and undeterred and unmatched ventures into terrains traversed by truly great political economists: Smith, Ricardo, Marx and Keynes. By knitting together what we all know to be the facts with cutting edge theory in economics, sociology, history and political science, the book paints an unflinching portrait of where we are and where we are headed. Are we ready to be honest with ourselves about the likely future of this overheated, overpopulated planet?
