Kirienko, Laurence Rahme, You-Hee Cho, 2019-12-24 *The Digital Environment and Small States in Europe* Viktorija Car, Marta Zorko, 2025-07-25 *The Digital Environment and Small States in Europe* delves into how the digital revolution intersects with global security dynamics and reshapes the geopolitical landscape. It sheds light on the geopolitical complexities inherent in the border regions of the European continent and proposes frameworks to better understand and engage with small state dynamics in international affairs. At the heart of this book is an examination of the transformative power of digitalization and virtualization particularly pronounced in the context of small states. Traditionally power was synonymous with territorial control but in today's world influence extends into the virtual realm. Small states despite their physical limitations can leverage this virtual extension of territory to their advantage. However realizing and strategically utilizing these advantages are essential for capitalizing on the opportunities presented. Conversely small states lacking digital capabilities find themselves increasingly vulnerable in the virtual sphere facing heightened security threats and challenges. Through a series of theoretical and case study based chapters this book offers insights into the strategies employed by small states to navigate these complexities and assert their influence on the global stage. Key themes explored include the impact of digitalization on geopolitical dynamics the role of cybersecurity in safeguarding national interests and the emergence of digital diplomacy as a tool for statecraft. *The Digital Environment and Small States in Europe* will be of great interest to scholars and students of international relations geopolitics and political science as well as security media and communication studies. Additionally policymakers and analysts involved in foreign policy and security affairs may find valuable insights in the book's exploration of small state strategies and vulnerabilities.

Rethinking the North American Long Poem Ridvan Askin, Julius Greve, 2024-12-15 For centuries critics poets poet scholars and philosophers have either openly proclaimed or tacitly assumed the long poem as the highest expression of literary ambition and excellence. *Rethinking the North American Long Poem* focuses on the North American variant of this notorious form notorious because of its often forbidding and difficult character particularly with respect to the dialectics of content and form aesthetics and politics matter and genre. In nine essays and a contextual introduction the editors and contributors scrutinize seminal long poems by North American writers including Walt Whitman's *Song of Myself* Ezra Pound's *The Cantos* Muriel Rukeyser's *The Book of the Dead* and Charles Olson's *The Maximus Poems*. They also explore recent efforts that have redefined or reopened the case of the long poem including Rachel Blau DuPlessis's *Drafts* M. NourbeSe Philip's *Zong* and Claudia Rankine's *Citizen*. Taking the categories of form matter and experiment as frames of conceptual reference the book examines the ways in which material and immaterial aspects of literary practice and the philosophically and politically inscribed duality of experience and experiment are negotiated in and by North American long poems from the nineteenth century to the present.
