this remarkable time in our history rather as a White Swan event one that catalyzed a more common occurrence of evolving Environmental Social and Governance ESG principles a mainstreaming of sustainability fueled by the digital innovations that designed ways to survive and thrive into a new and more holistic world order Now as we emerge from the remnants of the pandemic s aftermath we find ourselves at the late dawn of a new geologic epoch the Anthropocene where the impact of humans on the planet s geology and ecosystems looms so monumentally that the gravest threat to our existence stems from our own actions Contained within these pages you will discover insights from leaders across diverse domains community industry public administration and the investment community Through their own experiences we unfurl White Swan sightings moments when sustainability flourished in response to reverberations of the COVID 19 virus More poignantly the journey ahead carries us beyond the realm of the Black Swan while the acceleration of digital innovations equips us to herald a new era out of the Anthropocene and into a new one with sustainability innovations as a critical placemat The humanistic seismic shifts caused by the Pandemic will generate a future of holistic interoperability between digital and organic matters We are on the brink of designing unprecedented harmony with each other and equilibrium of regenerative growth with the world around us The urgency has never been greater nor the possibilities so profound [The Epworth Herald](#) ,1903 **The**
