My Therapist Is an AI - Can a Machine Understand the Human Soul? Leopoldo Ceballos del Castillo, 2025-07-23 Today between 500 and 700 million people around the world use artificial intelligence the so called chatbots to talk about their emotions seek comfort or resolve personal conflicts In numerous documented cases these interactions have led to psychotic episodes severe crises or decisions driven by misleading advice hallucinations or fabricated information generated by the AI itself Leopoldo Ceballos drawing on his dual background as a computer engineer and psychologist offers a bold and clarifying perspective to understand why millions of people prefer to talk to a machine instead of another human being and what we can do as a society to address this trend without giving up on our humanity The result is a critical and practical guide for using AI responsibly recognizing its real risks exploring accessible human alternatives and applying prompt engineering principles to minimize errors and misunderstandings when no other option is available A book for those brave enough to look beyond the glow of technology and ask themselves Are we truly ready to talk about our emotions with an artificial intelligence
