Byte Sized Ambition: Short Story Samantha,2024-07-14 In Silicon Valley s tech savvy landscape Alex Chen and Sarah Martinez two high school students embark on a journey to launch a startup using the power of AI With the help of ChatGPT they created a revolutionary personalized study planner app but their success is threatened by ethical concerns and cutthroat competition As they navigate the complex world of digital marketing they must confront the consequences of AI driven innovation and prove the originality of their work With their app on the line they present their case at a youth entrepreneurship conference facing off against established companies and revealing the future of AI in marketing Will their innovative approach and commitment to ethics win over the hearts and wallets of investors and customers or will they succumb to the pressures of the fast paced tech world

Start-up Wolf Olivia Yijian Liu,2024-05-28 Transnational entrepreneurs with technological know how have been promoted by the Chinese state and academic literature as a central force for regional development of industrial competitiveness But what motivates them and what do they experience and aspire to when building a start up in China This book answers these questions by examining how socially privileged entrepreneurial talents adopt and champion the wolf culture a fast paced competitive and aspirational work culture that has become prevalent since China s mass promotion of entrepreneurship and innovation Based on extensive field research including participant observation and interviews in Shenzhen s high tech industry this book challenges the popular notion of entrepreneurship as entirely self initiated and passion driven Outlining the concrete

instruments of governance of the local state the author argues that transnational talent from elite schools or elite professions is often entrepreneured in China Moreover she argues that the different standards of selection of entrepreneurial talents by state and market actors create localised precarious conditions for them This book offers fascinating insights into the contradictions inherent in the Chinese model of entrepreneurship Start up Wolf will appeal to scholars and students of China studies the anthropology of entrepreneurship science and technology studies and economic geography as well as business practitioners interested in innovation and high tech start ups The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

How To Take Good Notes Angelos Georgakis, 2017-06-25 Why would I need a book on how to take notes Notes are just notes FALSE Scientists have found that note taking can be as mentally demanding as playing chess can be for an expert While you take notes you listen carefully to the lecturer you process the new material you organize it in your working memory and you finally write down what you think is most important All this happens while someone is talking at an average speed of three words per second and someone is writing down at an average speed of one third of a word per second It doesn t sound easy now does it Notes are an important tool for learning We don t take notes just to record a few facts so we can review them later Learning happens as we take notes Taking notes the right way leads to good study practices better performance on exams and long term retention of information Note taking comes naturally FALSE Note taking is not obvious or intuitive Research has shown that students fail to capture 40% of the main points in a typical lecture First year students capture only 11% In some studies even the best note takers seem to record less than 75% of the important information People think they take good notes until they re told they don t Few of us have consciously thought about how we take notes let alone how to improve the quality of them We often reproduce the lecturer s phrases verbatim We don t save time by systematic use of abbreviations We fail to become a good psychologist of our lecturer We fail to pick up his enthusiasm We fail to interpret the tone of his voice We fail to read his body language And the result is that we fail to take good notes Anyway no one taught me how to take notes in school or in college TRUE Educators believe that students are able to assess the quality of their notes and follow good practices However studies have shown the exact opposite The fact that there isn t a course in college dedicated to the art of taking notes or learning in general makes students believe that this is a natural skill

that they can perfect with practice over the course of their studies At the end of the day everyone has their own way to take notes TRUE In this book you may be surprised to learn that I don't make any references to different types of note taking systems like those that other books do The reason is that it's the practices behind the note taking that matter most For example you should not copy the lecturer's phrases word for word but generate the main points in your own words And you should leave space on your notes for adding comments and testing yourself later I encourage students to use the Cornell note taking system because it utilizes most of the principles of effective note taking No matter which note taking system you decide to follow the cognitive effort you will have to expend is equally high Note taking may not be rocket science but it's definitely science cognitive science And cognitive science has produced a lot of useful insights that we can use now to take better notes This book presents these insights in simple words so you can make the most of your notes and use them to study effectively The title of this book is How to take good notes However note taking is just one part of the picture Note taking is much broader in the context of this book We take notes so we can interact with them later What matters most is what we do with our notes after we finish taking them Notes can do so many good things for you They hold all your learning efforts Treat them well Look after them
