Morgan, 2013-07-09 LIKE THE FEMALE SCIENTISTS PORTRAYED IN HIDDEN FIGURES MARY SHERMAN MORGAN WAS ANOTHER UNSUNG HEROINE OF THE SPACE AGE NOW HER STORY IS FINALLY TOLD This is the extraordinary true story of America's first female rocket scientist Told by her son it describes Mary Sherman Morgan's crucial contribution to launching America's first satellite and the author's labyrinthine journey to uncover his mother's lost legacy one buried deep under a lifetime of secrets political technological and personal In 1938 a young German rocket enthusiast named Wernher von Braun had dreams of building a rocket that could fly him to the moon In Ray North Dakota a young farm girl named Mary Sherman was attending high school In an age when girls rarely dreamed of a career in science Mary wanted to be a chemist A decade later the dreams of these two disparate individuals would coalesce in ways neither

could have imagined World War II and the Cold War space race with the Russians changed the fates of both von Braun and Mary Sherman Morgan. When von Braun and other top engineers could not find a solution to the repeated failures that plagued the nascent US rocket program North American Aviation where Sherman Morgan then worked was given the challenge. Recognizing her talent for chemistry company management turned the assignment over to young Mary. In the end America succeeded in launching rockets into space but only because of the joint efforts of the brilliant farm girl from North Dakota and the famous German scientist. While von Braun went on to become a high profile figure in NASA's manned space flight Mary Sherman Morgan and her contributions fell into obscurity until now.

Learning Languages Through Technology Elizabeth Hanson-Smith, Sarah Rilling, 2006. While posing important questions about how learning proceeds with new technologies this volume demonstrates how teachers captivate the imagination of learners from school children to postgraduates by providing real world purposes for language. The authors are from educational institutions in many regions of the world and describe technology use from the lowest levels such as word processing and scanning to high end multimedia and interactive communications through voice and video on the Internet. Technology is perhaps the best means to creating an environment conducive to language learning. Technology can support teachers in making language learning faster, easier, less painful and more engaging and helps create an optimal language learning environment. Learning Languages through Technology reflects the many and varied ways teachers are currently using computers and the Internet and provides a rich resource for both novice and expert educator. The volume is divided into four sections: Language Development, Online Skill Building through Technology, Content Based and Task Based Learning, Collaborative CALL, Authentic Audience in a Web Based World, Constructivism in Professional Development. Features throughout the volume are helpful to pre and in service teachers. Each chapter opens with a preview of ideas to ponder before reading and each of the four sections begins with a preview of the chapters and concludes with a thought provoking issue in technology and pedagogy. Follow up questions for class discussion, further research and activities appear at the end of each section leading readers further into the discussion of the role technology plays in learning both currently and in the future. Appendices list the tools, software and Web sites helpful in using technology with learners.
