**Artificial Intelligence and Work** John Bratton, Laura Steele, 2024-12-04 In an era marked by insecurity from neoliberalism financial volatility political instability regional conflicts pandemics and the climate crisis Artificial Intelligence AI is revolutionizing our work organizations societies and the environment This critical text explores

who truly benefits from AI's development and deployment offering a comprehensive overview of AI's nature history and applications. It delves into crucial themes such as the future of work, digitalization, neoliberalism's impact, power dynamics, ethics, inequality, gender, race, intersectional discrimination, and environmental sustainability. Unlike practical machine learning guides, this book examines how AI and AI-based technologies are transforming work, highlighting both benefits and potential harms. Combining critical management and leadership studies with organizational sociology, it addresses societal implications, inequality, ethics, and power often overlooked by other textbooks. John Bratton's lucid and engaging writing style brings a cutting-edge subject to life, blending breadth, critical analysis, and academic rigor. Contemporary examples illustrate AI's real-life implications for organizations and work today, while thought-provoking questions encourage readers to engage with and reflect on the topics throughout. Authored by John Bratton, an Honorary Professor at Queen's University Belfast, and Laura Steele, a Senior Lecturer in Business and Society at Queen's University Belfast, this interdisciplinary text is essential for students studying contemporary and emerging issues in business and management, including AI, business analytics, digitalization, and the future of work. It is also recommended for courses on the sociology of work, ethics, organization studies, management, leadership, and HRM. This book is poised to become an essential textbook for courses on AI, digitalization, and the future of work, making it a valuable resource for students and educators alike.

**Competitiveness Of Nations 1, The: Navigating The Us-china Trade War And The Covid-19 Global Pandemic** Dong-sung Cho, Hwuy-chang Moon, 2022-05-25

In the existing reports on national competitiveness and rankings such as IMD World Competitiveness Yearbook and WEF Global Competitiveness Report, there are sizable discrepancies in the ranking order for the same countries. As a result, the reader is often confused because such an outcome creates difficulties for government officials when translating these findings into real-world policies. These discrepancies are actually due to the differences in logic and analytical models used by IMD and WEF. Therefore, in recognizing the problems and limitations of these models, this book presents the IPS model as a new approach. As an extension of Michael Porter's diamond model, it demonstrates a robust set of methodologies as well as offers a number of key policy implications for countries around the world that wish to enhance their national competitiveness. The analytical tools used in this book can be further utilized for other units of analysis such as industries and firms. As this book provides a series of sophisticated methodologies and specific guidelines for enhancing national competitiveness, both academics and practitioners can derive useful implications from this research. Alongside the theoretical frameworks and methodologies for national competitiveness presented in this book, timely topics are included such as the COVID-19 global pandemic and the US-China trade war. This book also includes various country-specific real-world cases that are assessed from the perspective of both developed and developing countries.
