**Keeping Us Engaged** Christine Harrington, 2025-03-20. This revised edition of *Keeping Us Engaged* centers on in-classroom instruction, offering fresh student perspectives on how faculty can maximize engagement when teaching in person. Harrington expertly pairs all new student narratives, a signature feature of this much-loved volume, with easy-to-implement strategies that faculty can use to shift perspectives, strengthen connections with course material, and deepen learning. Topics range from starting positive on the first day of class to developing authentic assignments that push boundaries and giving compassionate, constructive feedback among other key areas. Each chapter is accompanied by sharply perceptive reflection prompts ideal for individual use or in faculty book groups and professional development workshops. Firmly grounded in active learning principles and enthusiastically endorsed by the learners themselves, this book is an essential resource for all faculty looking to better engage students in traditional face-to-face classroom instruction.

Computers in Education, 1990. **The Religious Herald**, 1924. Computers in Education Anne McDougall, Carolyn Dowling, IFIP Technical Committee 3, Education, 1990. This book is the result of the 1990 World Conference on Computers in Education. These conferences, held only once every five years, bring together computer educators from around the world to share their ideas, experiences, achievements, and frustrations in this rapidly developing field. The papers are grouped into streams and mini-conferences reflecting the logical organization of the conference. The streams include elementary, secondary, university, vocational education, and training research, and a rainbow for papers that cut across the streams. The mini-conference sections address the use of computer-based training in industry, new tools in the classroom, and computing in distance education.

Artificial Intelligence in Geography Stan Openshaw, Christine Openshaw, 1997-07-07. This unique work introduces the basic principles of artificial intelligence with applications in geographical teaching and

research GIS and planning Written in an accessible non technical and witty style this book marks the beginning of the AI revolution in geography with major implications for teaching and research The authors provide an easy to understand basic introduction to AI relevant to geography There are no special mathematical and statistical skills needed indeed these might well be a hindrance AI is a different way of looking at the world and it requires a willingness to experiment and readers who are unhindered by the baggage of obsolete technologies and outmoded philosophies of science will probably do best The text provides an introduction to expert systems neural nets genetic algorithms smart systems and artificial life and shows how they are likely to transform geographical enquiry A major methodological milestone in geography The first geographical book on artificial intelligence AI No need for previous mathematical or statistical skills knowledge Accessible style makes a difficult subject available to a wide audience Stan Openshaw is one of the world s leading researchers into geographical computing spatial analysis and GIS EasyWriter Andrea Lunsford,2025-09-25 EasyWriter is for every writer rule followers and risk takers AI users and those opting out confident readers and those still learning It s accessible affordable and reliable
