with developing the values and applying and evaluating the indices The history of severity indices the issues associated with estimating accident severity and associated costs and the range of indices that have been developed are described This publication of the Transportation Research Board also discusses the relationship of accident severity indices with the American Association of State Highway and Transportation Officials AASHTO Roadside Design Guide and the Federal Highway Administration FHWA ROADSIDE computer program While research since the 1960s has sought to quantify severity indices for a range of object types and impact conditions there remains a wide variation in the values from which analysts may choose when performing cost effectiveness evaluations
