Energy Networks and the Law Martha M. Roggenkamp, 2012-02-23 Energy supply depends on the means of transport to the consumer Cables and pipelines are necessary to transport oil gas and electricity Their construction and use depend on developments in technology policies and laws This book analyzes the challenges confronting governments regulators and network operators in managing energy networks

Geologic Carbon Sequestration V. Vishal, T.N. Singh, 2016-05-11 This exclusive compilation written by eminent experts from more than ten countries outlines the processes and methods for geologic sequestration in different sinks It discusses and highlights the details of individual storage types including recent advances in the science and technology of carbon storage The topic is of immense interest to geoscientists reservoir engineers environmentalists and researchers from the scientific and industrial communities working on the methodologies for carbon dioxide storage Increasing concentrations of anthropogenic carbon dioxide in the atmosphere are often held responsible for the rising temperature of the globe Geologic sequestration prevents atmospheric release of the waste greenhouse gases by storing them underground for geologically significant periods of time The book addresses the need for an understanding of carbon reservoir characteristics and behavior Other book volumes on carbon capture utilization and storage CCUS attempt to cover the entire process of CCUS but the topic of geologic sequestration is not discussed in detail This book focuses on the recent trends and up to date information on different storage rock types ranging from deep saline aquifers to coal to basaltic formations

Greenhouse Gas Control Technologies Edward S. Rubin, 2005 Following the successful publication of the proceedings of 6th Green House Gas Control Technology conference GHGT 6 Elsevier is proud to publish the proceedings from the 7th conference held in Vancouver in September 2004 The Greenhouse Gas Control Technologies conference series has established itself as the foremost conference bringing together the international energy community providing a forum for the discussion of the latest advances in the field of greenhouse gas control technologies

Carbon Dioxide Capture for Storage in Deep Geologic Formations - Results from the CO2 Capture Project

David C Thomas, Sally M Benson, 2005-01-06 Over the past decade the prospect of climate change resulting from anthropogenic CO₂ has become a matter of growing public concern Not only is the reduction of CO₂ emissions extremely important but keeping the cost at a manageable level is a prime priority for companies and the public alike The CO₂ capture project CCP came together with a common goal in mind find a technological process to capture CO₂ emissions that is relatively low cost and able to be expanded to industrial applications The Carbon Dioxide Capture and Storage Project outlines the research and findings of all the participating companies and associations involved in the CCP The final results of thousands of hours of research are outlined in the book showing a successful achievement of the CCP's goals for lower cost CO₂ capture technology and furthering the safe reliable option of geological storage The Carbon Dioxide Capture and Storage Project is a valuable reference for any scientists industrialists government agencies and companies interested in a

safer more cost efficient response to the CO2 crisis Succeeds in tackling the most important issues at the heart of the CO2 crisis lower cost and safer solutions and making the technology available at an industrial level Contains technical papers and findings of all researchers involved in the CO2 capture and storage project CCP Consolidates thousands of hours of research into a concise and valuable reference work providing up to the minute information on CO2 capture and underground storage alternatives *Greenhouse Gas Control Technologies - 6th International Conference* John Gale,Yoichi Kaya,2003-08-05

Climate change is an issue that is highly debated around the globe This book brings together the papers that were presented at a conference dedicated to this issue held in Kyoto in October 2002 Covering a broad range of areas the topics presented will benefit both those working in the field of carbon dioxide recovery and sequestration and those looking at the effects of non carbon dioxide greenhouse gases An overview of the Research and Design technologies which aid in mitigating climate change is included which will be invaluable to those researching new opportunities for dealing with this problem An area of research that has seen a rapid rise in worldwide spend Will benefit both researchers in climate change and those looking at new technologies to help deal with the problem Presents papers from contributors spread around the globe means that this book has world wide relevance **Review of Systemization of the Tooele Chemical Agent Disposal Facility** National
