With the advent of time the definition and meaning of administrative law has gone through a great deal of transition .From early 19th century to today's era the functions of the administration has increased manifold leading to a transformation in the meaning of the term administrative Law in accordance with the changes in the society.

HISTORICAL BACKGROUND

History of administrative law is mute and speaks very rare. In ancient times, it Was king's rule followed and admired by the citizens. King was the supreme power and laws made by him were mandatory to be followed.

It was a „Police state". It doesn't end here, and makes me to go into deepness of those days in which there was no system of government. Very object of the people was just to defend their respective territories from external rebellions & wars, maintaining tranquility and collect taxes from citizens for maintaining inter-state activities. It is usually known as „Laisser faire" system that leave government control over private business & direct result of which is freedom of private persons or personal bodies. Wherein, rich started becoming richer and poor, poorer. For abridging such trend a significant concept of „Government" was introduced

Government simply means keeping powers bestowed within the certain ambit and preventing powerful engine to run over country. This is how Governmental administration sums up, read with historical background.
