Advanced Trading Rules Second Edition Quantitative Finance:

Computational Finance Using C and C# George Levy, 2008-06-13 Computational Finance Using C and C raises computational finance to the next level using the languages of both standard C and C#. The inclusion of both these languages enables readers to match their use of the book to their firm's internal software and code requirements. The book also provides derivatives pricing information for equity derivatives, vanilla options, quantos, generic equity basket options, interest rate derivatives, FRAs, swaps, quantos, foreign exchange derivatives, FX forwards, FX options, and credit derivatives, credit default swaps, defaultable bonds, total return swaps. This book is organized into 8 chapters beginning with an overview of financial derivatives followed by an introduction to stochastic processes. The discussion then shifts to generation of random variates, European options, single asset American options, multi asset options, other financial derivatives, and C portfolio pricing application. The text is supported by a multi-tier website which enables purchasers of the book to download free software which includes executable files, configuration files, and results files. With these files the user can run the C portfolio pricing application and change the portfolio composition and the attributes of the deals. This book will be of interest to financial engineers and analysts as well as numerical analysts in banking, insurance, and corporate finance. Illustrates the use of C design patterns including dictionaries, abstract classes, and .NET InteropServices.

Funds of Hedge Funds Greg N. Gregoriou, 2011-04-01 With about 450 billion in assets, funds of hedge funds are the most recent darling of investors. While hedge funds carry high risk for the promise of high returns, they are designed for the very rich and for large institutional investors such as pension funds. A Fund of Hedge Funds (FOF) spreads investments among a number of hedge funds to reduce risk and provide diversification while maintaining the potential for higher than average returns. Odds are that some pension fund of yours is invested heavily in these products, and more recently these FOFs have been opened to more and more individual investors in offshore jurisdictions with lower minimum entry levels. Since this is a new and extremely fast-moving financial phenomenon, academic research has just begun in earnest, and this is the first book to present rigorous academic research by some of the leading lights in academic finance, carefully analyzing the broad array of issues involved in FOFs. With over 450 billion in assets, hedge funds of funds are the darling of investors. First book to present rigorous academic research about funds of funds. Leading lights in academic finance from around the world analyze the broad array of issues involved in funds of funds.

The Analytics of Risk Model Validation George A. Christodoulakis, Stephen Satchell, 2007-11-14

Risk model validation is an emerging and important area of research and has arisen because of Basel I and II These

regulatory initiatives require trading institutions and lending institutions to compute their reserve capital in a highly analytic way based on the use of internal risk models. It is part of the regulatory structure that these risk models be validated both internally and externally and there is a great shortage of information as to best practise. Editors Christodoulakis and Satchell collect papers that are beginning to appear by regulators consultants and academics to provide the first collection that focuses on the quantitative side of model validation. The book covers the three main areas of risk: Credit Risk and Market and Operational Risk. Risk model validation is a requirement of Basel I and II. The first collection of papers in this new and developing area of research. International authors cover model validation in credit market and operational risk. *The Bibliographic Index*, 2005. **Vault Guide to Advanced Finance and Quantitative Interviews** Jennifer Voitle, 2002.
