

Question 1

Let the preference of an individual is the following utility function

$$u(x_1, x_2, x_3) = \frac{x_1 x_2}{x_1 + x_2} + \log x_3.$$

His budget constraint is

$$p_1 x_1 + p_2 x_2 + p_3 x_3 = y.$$

- Calculate his Marshallian demand functions. (15 marks)
- Find his indirect utility function. (5 marks)
- Derive the Marshallian demand functions from the indirect utility function you already found in (b). What can you say about the answer you obtained with the result in (a)? Explain clearly. (7 marks)

Advanced Microeconomics Questions And Answers:

Advanced Microeconomics Bibhas Saha, 2024-07-08 *Advanced Microeconomics* presents microeconomic problems in an intuitive way. Using lucid narratives to build on students' initial understanding of economics and economic reality, equations and diagrams are incorporated to provide accessibility to students with a basic level of calculus to reach precise quantitative answers. It covers the standard areas of microeconomics such as consumer theory, producer theory, economics of uncertainty, general equilibrium, and markets. The book also includes new developments such as behavioural economics, prospect and regret theory, public sector, firms bargaining, signalling games, adverse selection, and moral hazard. Real life applications are given throughout the chapters, clearly showing students how the advanced theory connects to the real world. Each chapter provides a set of exercises for independent problem solving. Learning is also supported by lists of key terms, chapter summaries, and further reading suggestions. Advanced technical materials are presented in optional appendices. Digital supplements include quiz questions, solutions to exercises, and instructor materials. The flexible chapter sequencing in the book enables instructors to create their preferred syllabus. Developing students' intuitive appreciation for the theory as well as mathematical analysis, this is the ideal textbook for microeconomics courses at master's level, MSc and MRes, and advanced undergraduate level.

Advanced Microeconomics for Contract, Institutional, and Organizational Economics W. Bentley MacLeod, 2022-04-05 A graduate textbook on microeconomics covering decision theory, game theory, and the foundations of contract theory with a unique focus on the empirical. This graduate level text on microeconomics covering such topics as decision theory, game theory, bargaining theory, contract theory, trade under asymmetric information, and relational contract theory is unique in its emphasis on the interplay between theory and evidence. It reviews the microeconomic theory of exchange from the ground up, aiming to produce a set of models and hypotheses amenable to empirical exploration with particular focus on models that are useful for the study of contracts, institutions, and organizations. It explores research that extends price theory to the exchange of commodities when markets are incomplete, discussing recent developments in the field. Topics covered include the relationship between theory and evidence, decision theory as it is used in contract theory and institutional design, game theory, axiomatic and strategic bargaining theory, agency theory, and the class of models that are considered to constitute contract theory with discussions of moral hazard and trade with asymmetric information and the theory of relational contracts. The final chapter offers a nontechnical review that provides a guide to which model is the most appropriate for a particular application. End of chapter exercises help students expand their understanding of the material, and an appendix provides a brief introduction to optimization theory and the welfare theorem of general equilibrium theory. Students are assumed to be familiar with general equilibrium theory and basic constrained optimization theory.
