ACCOUNTING PRINCIPLES AND THE FINANCIAL STATEMENTS

Discussion Questions

DQ1.	The primary purpose of accounting is to provide decision makers with the financial information they need to make intelligent decisions. It is a valuable discipline because of the usefulness of the information it generates.
DQ2.	No. Not all economic events involve exchanges of value between the business and another party. For example, when a customer buys a product from a competitor, it is an economic event, but no exchange of value has taken place with our company and thus our company records no transaction.
DQ3.	Accounting treats sole proprietorships, partnerships, and corporations as entities separate and apart from their owners because each form represents a business (separate entity) for which financial performance must be measured and reported.
DQ4.	Expenses and withdrawals are the same in that they both reduce the owner's capital component of owner's equity. They are different in that expenses are also a component of net income, whereas withdrawals are a distribution of assets to the owner resulting from net income.
DQ5.	GAAP differs from the laws of mathematics in that they are not unchanging but rather are constantly evolving. They may change as business conditions change or as improved methods of accounting are introduced.
DQ6.	Like managers of profit-seeking businesses, managers of government and not-for-profit organizations must report to those who fund them, and they must operate their organizations in a financially prudent way.
DQ7.	CVS and Southwest are comparable in that like all companies they have two main goals: profitability and liquidity. How companies such as CVS and Southwest achieve these goals may make them incomparable in certain ways. For instance, CVS is a retail (pharmacy and related) company, whereas Southwest is a service (air transportation) company. CVS buys and leases retail stores, whereas Southwest buys and leases aircraft.
DQ8.	Unethical ways of accounting include recording and reporting business transactions that did not occur or being dishonest in recording those that did occur. Fraudulent financial reporting is the unethical preparation of financial statements that misrepresent a company's financial situation or contain false information.
