

# Study Habits for College Students That Actually Work

## Organization is key

Getting a college strategic planner should be your top priority. This could be an artistically designed planner, a blank notebook, or a wall calendar.

2

## The PQ4R Method

The short form PQ4R refers to the six steps in the study procedure. Its active approach to learning makes it one of the best ways to learn.

4

## Identify Your Learning Style

Finding the study methods that work best for you needs some time and trial. Testing your knowledge is not limited to going over your notes or flashcards.

6

## Study Together with Friends

Studying with friends can increase the fun and efficacy of the process! Invite your fellow students to study with you at a specific time and place.

8

## Do Not Procrastinate

Consider studying a little every day instead of saving everything for the week before the test. Establish goals for yourself before each study session.

10

1

## The SQ3R Method

SQ3R study method is one of the most effective study strategies for helping students find important information and remember it from their textbooks.

3

## Find Your Weaknesses

Everyone has a weakness when it comes to studying. Understanding your areas of weakness in studies can also help you study more productively.

5

## Create Color-Coded Notes

Using color-coded notes is one of the best study habits for college students. Moreover, it helps in the review and ranking of the most crucial concepts.

7

## Study Wisely Rather Than Hardly

College professors can sometimes advise you on what will or won't be covered on an exam. This study habit for college students can make their learning easier.

9

## Take Breaks

You can achieve maximum productivity by working for about 50 minutes and then taking a 15–20-minute break.

## **Achievement Motivation Study Habits And Academic:**

An Achievement Motivation and Study Habits of School Going Students Dr. Gangaben Patel, 2016-06-01 Education is the process of developing the capacities and potentials of the individual so as to prepare that individual to be successful in a specific society or culture. From this perspective, education is serving primarily as an individual development function. Education begins at birth and continues throughout life. It is constant and on going. Schooling generally begins somewhere between the ages four and six when children are gathered together for the purposes of specific guidance related to skills and competencies that society deems important. In the past, once the formal primary and secondary schooling was completed, the process was finished. However, in today's information age, adults are quite often learning in informal settings throughout their working lives and even into retirement.

**Motivation and Learning Strategies for College Success** Myron H. Dembo, Helena Seli, 2004-03-05 A motivation and learning strategies textbook that bridges research and practice. *Motivation and Learning Strategies for College Success* Second Edition teaches college students how to become more self-directed learners. Study skills are treated as a serious academic course. Students learn about human motivation and learning as they improve their study skills. The text does not offer recipes for success or lists of quick tips. Rather, the focus is on relevant information and features designed to help students to identify the components of academic learning that contribute to high achievement, to master and practice effective learning and study strategies, and then to complete self-management studies whereby they are taught a process for improving their academic behavior. A framework organized around six components related to academic success: motivation, methods of learning, time management, control of the physical and social environment, and performance, makes it easy for students to understand what they need to do to become more successful in the classroom. The text combines an overview of theory and research to help learners understand what factors determine or influence successful learning and why they are asked to use different study and learning strategies. In the text, with field-tested exercises, follow-up activities, and appendices that assist students in observing and changing their own behavior. A separate Instructor's Manual provides helpful information for teaching the material, includes additional exercises and experiences for students, provides both objective and essay test questions, and includes information on how students can maintain a portfolio to demonstrate their acquisition of learning and study skills and guidelines for helping students complete a self-management study of their own behavior.
