McSweeney, P. F. Fox, 2013-01-08 Professor Fox's multi volume Advanced Dairy Chemistry set was first published in four volumes in the early 1980s. A second edition came out in the early 1990s and an updated third edition was published a decade later. The set is the leading major reference on dairy chemistry providing in depth coverage of milk proteins, lipids and lactose. The editors propose beginning the revision cycle again with a revised first volume on proteins to be divided and published separately as Volume 1A Proteins Basics Aspects and Volume 1B Applied Aspects. Fox and his co editor Paul McSweeney have created an extensively revised Table of Contents for Volume 1A which details the novel and updated chapters to be included in this upcoming fourth edition. New contributors include highly regarded dairy scientists and scholars from around the world.

Food Proteins Shuryo Nakai, H. Wayne Modler, 2000. *Food Proteins* offers information required for improving the quality of food protein products. The text will help in gaining new ideas for conducting useful research on food proteins and enzymes. Focuses on both the physical and chemical properties of food proteins and the application of food proteins in food processing. Includes the fundamental concept required for understanding the modern food protein chemistry. Explores the relationships between the structures, functions and properties of different food proteins.
