course-corrections immediately Sujay Rao Mandavilli,2024-04-09 Education is the fundamental pillar upon which any human civilization rests As a matter of fact no civilization in any meaningful form or degree has been possible in human history that has not been built on the bulwark and edifice of education While literacy may have been limited to the privileged few in early ancient civilizations it was these privileged few who controlled the masses and set the tempo for meaningful progress in such civilizations educational systems have proven to be the bedrock and foundational pillar upon which much of human accomplishment and achievement have rested too In spite of the naysayers the cynics and the pessimists education has expanded greatly in the twentieth century while the worlds earliest civilizations were not western in the canonical sense

of the term there is no denying that western civilizations have pulled away strongly since then Riding on the shoulders on ancient Greece western intellectualism has been the bulwark upon which the superstructure of modern civilization has been built Even as recently as the middle of the twentieth century the rest of the world as opposed to the west had a lot of catching up to do Thankfully and mercifully a lot has changed since then India in the 1950 s and 1960 s emphasized higher education but neglected universal primary education as evidenced by low primary school enrollments and a high rate of dropouts Since then programs and schemes such as the Sarva Siksha Abhiyan or education for all programs have increased primary school enrollment considerably India now comfortably stands on the threshold of universal adult literacy While the quantity of education has been augmented quality has often failed to keep pace The tenets and the essential doctrines forming a part and parcel of the foundational pillars of pedagogy and education are antiquated and are still steeped in the western experience What is worse is that is very little awareness on the issue of the need for change this must be the foundation of all meaningful change but alas that foundation has yet to be built In this book we draw upon our long list of papers on the social science particularly anthropological pedagogy and the sociology of science and propose the direction we believe pedagogy must take in the twenty first century This can be no one man army we invite other scholars to contribute in eminent measure We also believe that this i e a foundational assessment of the concepts of pedagogy must become one of the more important and vital movements of the twenty first century This work is also at the heart of our globalization of science movement as many if not most concepts in various fields of the social science are based on old and archaic western centric paradigms There is also an unnatural gap between various fields of social sciences and the non social sciences too just as careerism is rampant across disciplines and what we called institutional coherentism is lacking Scientists say however recent research has shown that Does that mean that old research was wrong Why was it wrong Was it due to the absence of data or was it methodological error Why do we go round and round without a meaningful long term direction Very little scholarship is driven by the absolute desire to do good to society As Thomas Paine once famously stated A body of men holding themselves accountable to nobody ought not to be trusted by anybody We have theories theories and only theories all driven by old fashioned careerism or academic rivalry and with limited explanatory power All this needs to change in the twenty first century and practical application of knowledge emphasized To quote C S Lewis Experience that most brutal of teachers But you learn my God do you learn Anand Mahindra and several other individuals have repeatedly called for a new world class education system in India and elsewhere but there is very little conceptual clarity on how we should go about creating one Let a million scholars bloom Let a million intellectuals bloom Let a million scientists social scientists included bloom in different parts of the world all in the twenty first century Why should we hold our tongue and suffer in silence Let intellectuals drive meaningful and productive change Let better education systems form the backbone of better societies Let there be a healthy rivalry among nations to develop better and better education systems There is no need for only western

nations to take the lead here Those who have better ideas can indeed leapfrog everyone else Those who think better and do better win

ADOLESCENCE EDUCATION CHOUDHARY, GIRISH BALA, 2014-07-18 The young and adolescents are an epitome of change hope and progress The lives of adolescents are subject to global challenges faced by information and technological revolution changing markets and globalization and specific changes taking place in family dynamics cultural traditions religious beliefs and other socialization practices This book on Adolescence Education assumes importance in view of the likely impact of acquired skills and behaviours during this period on an individual's prospects in adulthood This book is an attempt to understand the broader context in which adolescent lives are embedded The theoretical perspective presents a multi disciplinary view of adolescence that helps to understand the evolution of the concept of adolescence Presenting an elaborate account of adolescence as experienced by young in India and highlighting the challenges that emerge as a result of dynamic changes in society the attempt is made to identify the emerging issues and concerns that impact the lives of adolescents and provide a perspective to adolescence education The historical account presented helps to build an understanding of the various socio cultural forces that led to the emergence of the existing Adolescence Education Programme AEP The text presents the key features of the present AEP that are imperative for its successful implementation The UN and civil society initiatives are mapped with a view to locate the characteristic features and thrust of various interventions The text gives some gleanings from available evidences regarding execution of various existing adolescent programmes and existential realities of adolescents' lives The book is intended for the undergraduate and postgraduate students of Education Psychology and Sociology Besides the book is equally beneficial for the students opting for Psychology at their 2 level

LEARNING AND THE LEARNER N. SUKUMAR GOWDA, 2015-07-01 The book in its new edition continues to discuss the processes and problems of learning in the triadic framework of learner curriculum teacher The purpose of the book is to help the educators develop newer insights into the nature and problems of the learner and as a result to enable them develop their own approaches to teaching so as to improve learning The phenomenon and the process of learning has been looked at in a comprehensive and integrated manner in this book The concept of learning is discussed by positing its meaning in the wider context of school curriculum and education He attempts to answer the question how people learn from the philosophical physiological and psychological perspectives Pedology and pedagogy are the two major components of educational theory The chapter on Creative Pedagogy outlines the conceptual and practical interrelationship between learning and teaching This chapter also outlines the different modes of teaching and discusses the teacher's role in fostering creativity and teaching children how to learn Learning disabilities particularly those related to reading spelling and computation are also presented Finally the book envisions the future classrooms and strongly advocates liberated creative democratic collaborative and humanistic classrooms He recommends that Learning Resource Centres should be preferred to the traditional classrooms This book is intended to be a useful handbook for the students of education and psychology and for

Why we need a revolution in the Social sciences: A post-colonial perspective Sujay Rao Mandavilli, 2024-05-11 We began our work in right and in serious earnest in the year 2005 November 14th 2005 to be precise when children's day is celebrated all over India in commemoration of the birthday of Pandit Jawaharlal Nehru the first Prime Minister of India The underlying philosophy of our work however stretches back to the early 1990s even the mid 1980s when we faced a great deal of cognitive dissonance in many of our endeavours and daily walks of life due to a constant exposure to and a bombardment by a large number of philosophies and ideas from different sources both human and non human In the year 2005 particularly after the aforesaid date we had reached out to several leading lights and luminaries in the fields of science religion philosophy and spirituality with a great deal of hope to meaningfully engage with them and elicit their own pet theories proposals and viewpoints on various issues and topics We had hoped that this would also help us in our own voyage and journey of discovery The results were indeed startling there was a wide variation in viewpoints based on the scholar in question's own religious linguistic and nationalistic affiliation and loyalties Therefore the age of ideology has still not formally or conceptually ended ending this can change many fundamental equations at a grassroots level and can make life better for all of us living in different parts of the world As a matter of fact Eurocentric biases in various fields of the social sciences has only served to throw up counter reactions and exacerbate ideological differences Intellectualism is also still weak in general particularly in developing countries particularly owing to the following factors
