[A Human's Guide to Machine Intelligence](#) Kartik Hosanagar, 2020-03-10 A Wharton professor and tech entrepreneur examines how algorithms and artificial intelligence are starting to run every aspect of our lives and how we can shape the way they impact us Through the technology embedded in almost every major tech platform

and every web enabled device algorithms and the artificial intelligence that underlies them make a staggering number of everyday decisions for us from what products we buy to where we decide to eat to how we consume our news to whom we date and how we find a job We've even delegated life and death decisions to algorithms decisions once made by doctors pilots and judges In his new book Kartik Hosanagar surveys the brave new world of algorithmic decision making and reveals the potentially dangerous biases they can give rise to as they increasingly run our lives He makes the compelling case that we need to arm ourselves with a better deeper more nuanced understanding of the phenomenon of algorithmic thinking And he gives us a route in pointing out that algorithms often think a lot like their creators that is like you and me Hosanagar draws on his experiences designing algorithms professionally as well as on history computer science and psychology to explore how algorithms work and why they occasionally go rogue what drives our trust in them and the many ramifications of algorithmic decision making He examines episodes like Microsoft's chatbot Tay which was designed to converse on social media like a teenage girl but instead turned sexist and racist the fatal accidents of self driving cars and even our own common and often frustrating experiences on services like Netflix and Amazon A Human's Guide to Machine Intelligence is an entertaining and provocative look at one of the most important developments of our time and a practical user's guide to this first wave of practical artificial intelligence

*Handbook On Computer Learning And Intelligence (In 2 Volumes)* Plamen Parvanov Angelov, 2022-06-29 The Handbook on Computer Learning and Intelligence is a second edition which aims to be a one stop shop for the various aspects of the broad research area of computer learning and intelligence This field of research evolved so much in the last five years that it necessitates this new edition of the earlier Handbook on Computational Intelligence This two volume handbook is divided into five parts Volume 1 covers Explainable AI and Supervised Learning Volume 2 covers three parts Deep Learning Intelligent Control and Evolutionary Computation The chapters detail the theory methodology and applications of computer learning and intelligence and are authored by some of the leading experts in the respective areas The fifteen core chapters of the previous edition have been written and significantly refreshed by the same authors Parts of the handbook have evolved to keep pace with the latest developments in computational intelligence in the areas that span across Machine Learning and Artificial Intelligence The Handbook remains dedicated to applications and engineering orientated aspects of these areas over abstract theories Related Links [Privacy, Technology, and the Criminal Process](#)

Andrew Roberts, Joe Purshouse, Jason Bosland, 2023-07-28 This collection considers the implications for privacy of the utilisation of new technologies in the criminal process In most modern liberal democratic states privacy is considered a basic right Many national constitutions and almost all international human rights instruments include some guarantee of privacy Yet privacy interests appear to have had relatively little influence on criminal justice policy making The threat that technology poses to these interests demands critical re evaluation of current law policy and practice This is provided by the contributions to this volume They offer legal criminological philosophical and comparative perspectives The book will be of

interest to legal and criminological scholars and postgraduate students Its interdisciplinary methodology and focus on the intersection between law and technology make it also relevant for philosophers and those interested in science and technology studies    Youth's Companion ,1877    The Youth's Companion Nathaniel Willis,Daniel Sharp Ford,1900
