First chapter starts with Strategy which acts as a tool to overcome the increasing challenges faced by business and IT. Strategy is governed across every layer of architecture to accomplish SOA-based service possessing strategic capabilities. Business Strategy plans the business to achieve strategic alignment, desired growth, synergy, realization, and competitive advantage under all circumstances at minimal cost. Based on business strategy, IT Strategy evolves which leads to IT Foundation composed of IT Capability Model and IT Operating Model. Second chapter presents development of Business Architecture which elaborates the business illustrated with Frameworks, Business Motivation Model, Organizational Structure, Value added Chain, Key Performance Indicators, Key Risk Indicators, Strategy and Tactics, Business Scenarios, Business Process Model, Business Services, Use Cases, Capability Models, and Business Services. Capability based planning approach supported with alignment framework applies SOA to transform business functionalities into business services supported with capabilities. Business architecture includes the domain functionalities modeled as SOA-based service aligned with strategy. The business architecture built as SOA-based consolidated business services are directly mapped into IT services for business aligned, agile, and effective IT solution. Third chapter deals with development of Information System Data and Application Architecture.
