Bartlett, Jose L. Ramirez-Garcia Luna, 2023-12-11 This book discusses optical technologies for Diabetic Foot management. It combines the current medical literature review with an overview of the technology and physics behind it. Thus it is a single source introduction to the topic. It can also be used as a reference source and practical guide for the use of technology. The particular focus is on low cost technologies including hyperspectral imaging thermography and endogenous bacterial fluorescence. Moving diagnostic modalities closer to the patient e.g. primary care allows the disease to be detected at an earlier stage thus improving outcomes. However while some optical technologies are
