

## European Code of Practice For Feed Additive and Premixture Operators

### INTRODUCTION

This European Code of Practice for Animal Feed Additive and Premixture Operators ('Code') responds to the Regulation of the European Parliament and the Council laying down requirements for feed hygiene, (183/2005/EC), articles 20 to 22 of which encourage the development of guides to good practice for hygiene and the application of HACCP principles.

Implementation of the code aims to ensure the safety of feed additives and premixtures, the operation of businesses in accordance with European feed hygiene requirements, and improved traceability. The code also applies to import from third countries of feed additives and premixtures.

In order to align the Code with current animal feed legislation and various activities on national, industrial and/or association levels, it takes into account the principles of feed and food safety as well as HACCP principles that are set out in:

- The European Commission's White Paper on Food Safety (COM (1999) 719 final)
- European Council Directives 95/69/EEC and 98/51/EEC. (Laying down conditions and arrangements for approving and registering establishments and intermediaries in the animal feed sector).
- Regulation of the European Parliament and of the Council on additives for use in animal nutrition. (1831/2003/EC).
- Regulation of the European Parliament and of the Council of 28 January 2002 laying down the general principles and requirements of food law, establishing the European Food Safety Authority. (178/2002/EC).
- Regulation of the European Parliament and of the Council laying down requirements for feed hygiene. (183/2005/EC).
- The relevant codes of practice of the Codex Alimentarius.
- The principles of HACCP, re. Codex Alimentarius, General principles of Food Hygiene, (CAC/RCP 1-1969, Rev. 4-2003 Amd. (1999), Annex on Hazard Analysis and Critical Control Point (HACCP) System and Guidelines for its Application), <http://www.codexalimentarius.net/>.
- Management systems developed by associations in different Member States, for instance: Code of Practice (FEFAC, EU), FEMAS (AIC, UK), GMP (OVOCOM, B), GMP+ (PDV, NI), Q+S (DVT, D).

The combination of the above principles provides guidance for feed additive and premixture operators in implementing the measures necessary to ensure feed safety in European and international manufacturing and trade. In order to facilitate implementation of the Code, the structure of ISO 9001:2000, Quality Management Systems, is used.

**Private food law** Bernd van der Meulen, 2023-09-04 Since the turn of the Millennium world wide initiatives from the private sector have turned the regulatory environment for food businesses upside down For the first time in legal literature this book analyses private law initiatives relating to the food chain often referred to as private voluntary standards or schemes Private standards are used to remedy flaws in legislation in order to reach higher levels of consumer protection than the ones chosen by the EU legislature and to manage risks and liability beyond the traditional limits of food businesses We see that litigation is no longer solely framed by legislative requirements but ever more by private standards such as GlobalGAP BRC IFS SQF and ISO These private standards incorporate public law requirements thus embedding them in contractual relations and exporting them beyond the jurisdiction of public legislators Other standards focus on corporate social responsibility or sustainability This book also addresses how private religious standards such as Kosher and Halal play a role in defining specific markets of growing importance It is noted that organic standards have found an interesting symbioses with public law Another development on this topic is that food businesses are inspected more often by private auditors than by public inspectors Effects in terms of receiving or being denied certification far outweigh public law sanctions In short private law has changed an entire legal infrastructure for the food sector It emerges as competing with the public law regulatory infrastructure This book is of interest to all who concern themselves with food law legislation and litigation and the evolving role of private standards on changing the landscape of food chains and innovation
