

Experimental Research Designs

Experimental research is a type of research in which the researcher manipulates one or more independent variables to observe the effect on the dependent variable. This type of research is often used to establish causal relationships between variables. The experimental design is a plan or blueprint for the study that outlines the procedures for data collection and analysis.

Experimental Design

The experimental design is a plan or blueprint for the study that outlines the procedures for data collection and analysis. It includes details about the independent and dependent variables, the experimental conditions, and the methods for data collection and analysis.

The experimental design is a plan or blueprint for the study that outlines the procedures for data collection and analysis. It includes details about the independent and dependent variables, the experimental conditions, and the methods for data collection and analysis.
