

Chapter 1

Operations and Productivity

Background

Operations management has created industry giants. The Ritz-Carlton Hotel Company's mission is to provide an outstanding customer experience through a complete focus on quality management. UPS operates trucks that run for 20 years because their drivers care. Disney has made a science of accurate forecasts and queuing theory. Darden restaurants (Olive Garden and others) view operations as their strategy for success. Frito-Lay dominates the snack market by keeping fresh snacks on the shelves with a production process that converts raw materials into a bag of chips sitting in a grocery store in as little as a day or two.

The importance of operations management can be highlighted early in the course with humorous videos or stories about "operations gone wrong." Most people can share "disaster" stories about poor experiences that they have had dealing with companies.

It can be useful as well to spend some class time right away on the job market for operations management majors, showing starting salaries and job titles compared to other business majors. It can also be helpful to find an MBA program with a strong operations focus and display the starting salaries of those graduates. (Such data are available on many MBA program websites.) Instructors can also share research results showing that (1) more CEOs "learn the ropes" by coming up through operations than any other functional area, and (2) Chief Operating Officer salaries tend to be approximately 10% higher than the salaries of the other "Chiefs" (CFO, CMO, and CIO).

Class Discussion Ideas

1. Choose an organization the students will be familiar with and ask them to identify and describe the product of that organization. Direct the discussion to highlight the complex nature of the product offerings of most organizations today where product and service elements are found to some degree in almost all organizations.
2. Have the students choose a few different tasks or jobs and identify possible productivity measures for these. They should describe how they would go about making the necessary measurements. Student and faculty productivity are easy examples that can generate quite a bit of discussion. One possible way to start the discussion is to ask whether grades or research output is an effective measure of student and faculty productivity, respectively.

Active Classroom Learning Exercises

1. Labor productivity is sometimes perceived to be driven by employee motivation. Have the students split up into small groups to discuss effective ways to motivate hourly employees vs. salaried managers. If productivity of these workers is below expectation, what are good and poor ways to try to motivate them? What methods might work well with blue collar employees but not white collar employees, and vice versa? What methods might work well in the short run but not in the long run,

Principles Of Operations Management Heizer Chapter 1 Solutions
