Pitfalls of AI Integration in Education: Skill Obsolescence, Misuse, and Bias Garcia, Manuel B.,Rosak-Szyrocka, Joanna,Bozkurt, Aras,2025-05-09 The integration of artificial intelligence AI in education rapidly transforms the teaching and learning process Recent systematic reviews have shown an increase in research studying the opportunities and challenges associated with AI in education This trend reflects a growing recognition of its potential to revolutionize educational practices However there are also growing concerns and issues with skill obsolescence leading to job displacement algorithm bias and misuse of AI for academic dishonesty As educational institutions increasingly rely on AI to enhance academic outcomes proactively addressing these challenges ensures the ethical and responsible use of AI in education Pitfalls of AI Integration in Education Skill Obsolescence Misuse and Bias offers a targeted exploration of the critical challenges and concerns that arise as AI becomes more embedded in educational systems Focusing on emerging issues it addresses the gaps in current research and practice shedding light on the ethical practical and pedagogical dilemmas that educators students and institutions face Covering topics such as school infrastructure critical academic skills and intellectual property protection this book is an excellent resource for educators school administrators policymakers professionals researchers academicians and more

Advancing Adaptive Education: Technological Innovations for Disability Support Çela, Eriona,Fonkam, Mathias Mbu,Vajjhala, Narasimha Rao,Eappen, Philip,2024-12-30 Advancing adaptive education through technological innovations is crucial in creating inclusive learning environments that cater to students with disabilities With the development of assistive technologies personalized learning tools and digital platforms educators can offer personalized educational experiences to accommodate diverse learning needs From speech recognition software and text to speech applications to AI powered tutoring systems and virtual classrooms these innovations enable students with disabilities to access education for which they were previously unable By harnessing technology adaptive education supports academic achievement while fostering greater independence and confidence among learners ensuring all students have the opportunity to succeed Advancing Adaptive Education Technological Innovations for Disability Support explores the intersection of education and technology focusing on how adaptive learning strategies and tools can support students with disabilities It provides a comprehensive examination of how technologies like artificial intelligence machine learning and assistive tools can be leveraged to create inclusive and personalized learning experiences This book covers topics such as assistive technology machine learning and student disability and is a useful resource for educators engineers computer scientists sociologists academicians and researchers

The Dawn of an AI-Infused Decade: An Introduction Riven Ashford,2025-09-18 Discover the Future of Humanity in an AI Infused Decade Step into a transformative era where artificial intelligence reshapes every facet of life work and society The Dawn of an AI Infused Decade offers a compelling accessible exploration of how AI will revolutionize healthcare education creativity transportation and our very understanding of

intelligence itself From intelligent cities and autonomous vehicles to breakthroughs in science and environmental sustainability this book unpacks the opportunities and ethical challenges of a rapidly evolving technological landscape It emphasizes human AI collaboration lifelong learning and responsible innovation guiding you to navigate and shape this new future Prepare to be inspired informed and empowered to participate in building an equitable innovative and human centered world The future begins now are you ready

Learning and Collaboration Technologies Brian K. Smith, Marcela Borge, 2025-05-31 The three volume set LNCS 15806 15808 constitutes the thoroughly refereed proceedings of the 12th International Conference on Learning and Collaboration Technologies LCT 2025 held as part of the 27th International Conference HCI International 2025 which took place in Gothenburg Sweden June 22 17 2025 The total of 1430 papers and 355 posters included in the HCII 2025 proceedings was carefully reviewed and selected from 7972 submissions The papers have been organized in topical sections as follows Part I Designing Learning Experiences Technological Innovation in Education Part II From Human Teachers to AI Educators Intelligent Learning Environments Part III Serious Games and Gamification Immersive Learning Understanding Learning Experiences

AI IN EDUCATION: EMPOWERING LEARNING AND TEACHING Prof. Sanjay Agal, 2023-08-21 With the assistance of artificial intelligence which has the ability to radically revolutionize the educational system the processes of teaching and learning may be made more successful This may be the case for both teaching and learning The ever expanding capabilities of AI make it feasible for it to develop personalised learning experiences to streamline administrative operations to improve student assessment and to give teachers with crucial insights In the field of education the following is a list of significant areas in which artificial intelligence is making learning and teaching more possible Individualized Instruction The ability of artificial intelligence to analyze vast amounts of student data such as performance preferences and learning styles enables it to give students with the opportunity to participate in individualized learning The material covered in a class as well as its pace and level of difficulty may be adjusted by intelligent tutoring systems to meet the needs of each specific learner This leads to improved levels of involvement and understanding on the part of the students Platforms for Adaptive Learning AI powered adaptive learning platforms utilize algorithms that continually assess a student's progress and adjust the learning material accordingly The name given to these kinds of systems is adaptive learning platforms These platforms either identify the specific areas in which students need further practice or present them with additional resources to assist them with their study Because it caters to the specific requirements of each individual student adaptive learning is able to maximize the educational advantages that it offers to their fullest potential Intelligent Virtual Assistants Chatbots and other types of virtual assistants that are driven by artificial intelligence AI are available to provide students with rapid help They are able to provide students with answers explanations and support as well as send them in the direction of resources that are relevant to the situation Intelligent virtual assistants make it easier to obtain more information and also promote individual study 1 P a ge Automated

marking and commenting systems Artificial intelligence has the ability to automate the grading process for objective tests such as multiple choice questions This would free up the time of educators so that they could focus on more involved tasks Techniques such as Natural Language Processing NLP make it feasible for artificial intelligence to evaluate subjective forms of assessment such as essays and provide students detailed feedback The employment of artificial intelligence AI technology which may assist educators in producing content of a higher level may be of assistance in the production of intelligent content They are able to generate interactive materials develop tests and pick resources in a manner that is congruent with certain educational objectives Tools for producing content that are powered by artificial intelligence boost efficiency and help teachers generate interesting instructional materials Analytics Predictive Artificial intelligence is able to spot patterns and produce forecasts by analyzing huge volumes of data which allows it to generate predictions about the performance of pupils as well as their behavior and the repercussions of their activities Educators have the ability to make use of these insights in order to intervene early and provide timely assistance to students who are having difficulty so improving both retention rates and academic attainment The terms Virtual Reality VR and Augmented Reality AR refer to the following Virtual reality VR and augmented reality AR may deliver learning experiences that are both immersive and engaging if they are combined with AI technology Students have the chance to expand both their theoretical understanding and their ability to put that understanding into practice in a range of domains by exploring virtual environments carrying out experiments and taking part in simulations Making decisions based on the data provided Artificial intelligence assists many stakeholders in the education system in making decisions based on data The analytics made available by AI could be of use to administrators at educational institutions in recognizing trends enhancing resource allocation and improving operational efficiency Dashboards that are powered by AI provide real time information on the progress that students are making allowing instructors to adjust their instructional strategies in accordance with the needs of their pupils
