and threats to organisations the Internet and its potential for electronic commerce poses fresh challenges So far much hype surrounds the subject of electronic commerce and its possibilities for leveraging business advantage Whilst governments on both sides of the Atlantic urge companies to invest in Internet technology and develop e business past lessons from IT investment have often been disappointing Likewise the rapid growth of IT outsourcing in the 1980s and 1990s produced mixed results Whereas some companies successfully reduced costs and improved their performance through outsourcing others were permanently damaged as management failed to address important issues relating to the IT strategy and infrastructure The Global Information Society addresses the phenomenon of the global information society in the context of market technology management practice capabilities and skills and the role of government Designed for academics practitioners and students this book does not offer simple solutions to complex business problems Instead it critically evaluates models frameworks debates and observations relating to these five key themes within the global information society

**Employee Retention in Change Management Processes. Practical Experience** Michael Kurwan, 2023-04-21 Document from the year 2023 in the subject Leadership and Human Resources Leadership language English abstract Retaining employees for the long term within the framework of change management processes is a challenging management task In change management processes a fundamental distinction must be made between incremental change management and radical change management While incremental change happens continuously and is integrated into everyday work radical change represents a strategic realignment of the company which is predominantly associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of turnarounds where cost cutting programs play a crucial role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous

improvement than with radical change as these could also be affected by staff reductions This stirs up fears among employees and therefore often leads to high turnover Therefore it is important for management to actively involve employees in the changes to empower them to act as change agents so that they can actively shape the change To do this it is crucial to identify the key personnel that a company cannot do without The management and key personnel are given the task of actively accompanying the company's employees on the journey of change so that the company can grow sustainably again from a lower level after the strategic realignment so that the remaining employees have a prosperous future Open communication and excellent transparency on the part of the management which should also act as a unit help to bring the employees along on the change journey in a targeted manner However experience has shown that 50% of all change management projects in the industry fail and 20% are implemented inadequately due to two crucial reasons namely power struggles within management and resistance from employees For this reason it is imperative that a company's management team select a leadership coalition of similarly rational members who also have sufficient empathy to successfully manage the change management process which must be done together with employees and should not be directed against them The guiding coalition should develop a common strategic vision and practice a participative way of working involving everyone since the goal of transformation is to change the thinking of employees and transformation can only be brought about together with employees
