Gupta,2024-07-08 The most common form of severe dementia Alzheimer's disease AD is a cumulative neurological disorder
because of the degradation and death of nerve cells in the brain tissue intelligence steadily declines and most of its activities
are compromised in AD Before diving into the level of AD diagnosis it is essential to highlight the fundamental differences
between conventional machine learning ML and deep learning DL This work covers a number of photo preprocessing
approaches that aid in learning because image processing is essential for the diagnosis of AD The most crucial kind of neural
network for computer vision used in medical image processing is called a Convolutional Neural Network CNN The proposed
study will consider facial characteristics including expressions and eye movements using the diffusion model as part of CNN
s meticulous approach to Alzheimer's diagnosis Convolutional neural networks were used in an effort to sense Alzheimer's
