book isn't about replacing teachers with robots or adding more technology headaches to your plate. It's about introducing you to free, easy-to-use AI tools that can reduce your workload, spark creativity and free up time for what matters: connecting with your students. When I started researching AI in education, I was amazed by how many powerful tools were available at no cost. Teachers were using them to draft lesson plans in minutes, generate practice quizzes, provide personalised feedback and even keep their classrooms more organised. The more I explored, the clearer it became: every teacher deserves access to these tools and most importantly, guidance on how to use them effectively. A+, 1988 **Reimagining Talent** PV Ramana

Murthy, 2025-11-16 The world over, boards, CEOs, CHROs and top managements are united in their belief that managing talent is one of the most important aspects of running any business. And yet, there seems to be no clarity on what constitutes talent and how one should identify and nurture it. Traditional tools such as bell curves, nine-block grids, potential assessments etc. often create more frustration than clarity among employees. At the same time, organizations struggle to identify the right talent and retain them in an environment marked by high volatility and low engagement. **Reimagining Talent** challenges and demystifies many of the long-held assumptions about talent in the corporate world. At the very heart of this book is a groundbreaking talent architecture arrived at through solid research and interviews with employees and senior leaders from corporates across diverse regions including India, the United States of America, Japan, the Middle East, Romania, the United Kingdom and Germany. It introduces a practical road map: the Three Cs of Talent Enablers: Culture of Oneness, Competitive Adaptability and Complexity, to help organizations move beyond outdated practices and embed genuine talent management into their core business strategy. Grounded in real-life examples and credible research, **Reimagining Talent** demonstrates how organizations and employees can unlock their full potential and help both individuals and businesses grow collectively.

The Irish Teachers' Journal and Assistant, 1870 **Agrindex**, 1992 **Digital Media in EFL Classrooms**, 2025-02-26 Seminar paper from the year 2024 in the subject English Language and Literature Studies / Linguistics, grade 1.0, University of Kaiserslautern, Anglistik course, Linguistics, language: English, abstract. Nowadays, English as a second language is more challenging for learners than ever. Shifting the focus on pronunciation teaching occasionally also puts more value on other issues like interference between sound systems in L2 classrooms. Technologies such as audio conferencing, video chat rooms, AI, Artificial Intelligence and online learning platforms may have great potential to help learners overcome pronunciation difficulties. At the beginning of 2019, when COVID-19 struck down the globalized world and every country's educational sector, these insights became more than relevant. At this time, overstrained teachers and students had to provide and perceive everything through online resources only to acknowledge the benefits of media in pronunciation teaching after a short period. **AI GUIDE FOR TEACHERS** Dean Jordan, AI is changing the world and classrooms are no exception.
