Designing Instruction with Generative AI Brent A. Anders, 2025-09-16 Designing Instruction with Generative AI offers a novel set of tools and strategies for leveraging generative AI to create engaging and personalized learning experiences. While instructional designers are a tremendous asset to higher education, not all colleges or universities have the robust staff needed to support all instructors on staff or large student populations. Drawing on a wealth of research, professional experience, and strategic insights, this book equips new and seasoned teaching faculty and trainers with step-by-step directions on how freely accessible artificial intelligence software can assist with all aspects of the course creation and instruction process and cater to the needs of diverse learners. Each chapter offers forward thinking and empirically validated ways to help faculty create and improve instructional materials, course design, and learning environments while supporting their digital literacies. Rather than introduce AI as a means of outsourcing subject area expertise, critical thinking, or cognitive processes, the author instead emphasizes its potential to build on traditionally honed knowledge and foundational instructional design practices. From optimizing course alignment and accessibility practices to fostering active learning, motivation, and engagement, educators will find new solutions to common teaching and learning challenges with greater efficiency in time and capacity. The Open Access version of this book is available at <http://www.taylorfrancis.com> and has been made available under a Creative Commons Attribution Non-Commercial No Derivatives CC BY-NC-ND 4.0 license.

Pitfalls of AI Integration in Education: Skill Obsolescence, Misuse, and Bias Garcia, Manuel B., Rosak-Szyrocka, Joanna, Bozkurt, Aras, 2025-05-09 The integration of artificial intelligence (AI) in education rapidly transforms the teaching and learning process. Recent systematic reviews have shown an increase in research studying the opportunities and challenges associated with AI in education. This trend reflects a growing recognition of its potential to revolutionize educational practices. However, there are also growing concerns and issues with skill obsolescence, leading to job displacement, algorithm bias, and misuse of AI for academic dishonesty. As educational institutions increasingly rely on AI to enhance academic outcomes, proactively addressing these challenges ensures the ethical and responsible use of AI in education. *Pitfalls of AI Integration in Education: Skill Obsolescence, Misuse, and Bias* offers a targeted exploration of the critical challenges and concerns that arise as AI becomes more embedded in educational systems. Focusing on emerging issues, it addresses the gaps in current research and practice, shedding light on the ethical, practical, and pedagogical dilemmas that educators, students, and institutions face. Covering topics such as school infrastructure, critical academic skills, and intellectual property protection, this book is an excellent resource for educators, school administrators, policymakers, professionals, researchers, academicians, and more.

Learning in the Anthropocene Carl A. Maida, 2023-11-13 *Learning in the Anthropocene: Reimagining Education in the Twenty-First Century* reimagines the education of future generations in our complex society. Carl A. Maida argues we are living in an era of transition that has been repeatedly called an age of

acceleration and in this time of crisis diverse constituencies will need to coalesce and create place based arenas for critical inquiry and reflection around biodiversity energy and sustainability concerns Education is therefore critical to the public sphere which is polarized by contentious debates over class ethnicity culture and more recently the fate of the planet He posits that two provinces the school and society can join together to afford students greater freedom to produce future knowledge by advancing experiential instructional approaches as humanity faces profound challenges to its existence
