Can 100% remote work attract more qualified candidates? Huong Hoang Thien,2023-05-25 Master's Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1.0 language English abstract What will happen if there aren't enough talents to fill the market in the future due to the demographical change This study focuses on the

potential of offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an inevitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographic change. Companies cannot operate their business correctly, increase revenue, or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies, offering remote work gives them complete access to the talent pools, including freelancers as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything's going remotely, companies have become an easier target of cyber attacks.

Working Remotely Is a New Normal Glenn Carrey, 2020-10-10

Working remotely is a new normal, and you have learned that remote work will look very different, whether you have been operating remotely for several years or are just starting. It depends on where you are working, what you focus on, who you work with, and what you work for. It depends on where you live and whether you live alone or with a group of other people. When you spend your time as a distant job, you will always remember that working remotely is an art. In a dispersed environment, individuals are not usually taught how to succeed. They systematically study design, marketing, advertising, production, finance, law, or education to learn a particular profession. But when they are not physically around, other people will perform the profession at a high level. On their own, remote employees have to understand. This book is especially for you if you work from home. Discover how a quality workspace can be set up. Learn the behaviors and practices which lead to the success of remote workers. In a dispersed workplace, you too will flourish. Working from home requires additional arrangements, purpose, and treatment. This toolkit's tips and guides are here to help you do your best job everywhere you work. It can seem like a beautiful dreamland for those who do not have the chance to do it full of cozy jammies, no noise, and daytime TV. But for all of those who routinely

Management of Remote Workers Douglas Sandfield Staples, 1997. This research study investigated the practice of managing people remotely and the potential enabling role of information technology (IT) in enhancing the ability to manage and be managed remotely. Remote management was defined as managing employees who work in a physically separate location from their managers. The research questions investigated dealt with the key issues of remote management: the actions which could potentially contribute to effective remote management and the role information technology played in enabling effective remote management.
