Reimagining Intelligent Computer-Assisted

Language Education Stevkovska, Marija, Klemenčič, Marijana, Kavaklı Ulutaş, Nurdan, 2024-10-18 Reimagining language education through intelligent technologies and computer assistance marks a shift in how we approach language learning in the digital age. With advancements in artificial intelligence and machine learning, there is potential to transform traditional methods into personalized educational experiences. Intelligent systems now offer adaptive learning pathways that cater to individual proficiency levels, learning styles, and progress rates, making language education more accessible and effective. These technologies beg further exploration to effectively provide real-time feedback and support, creating a more engaging and responsive educational experience. *Reimagining Intelligent Computer Assisted Language Education* explores fundamental aspects of educational technology to improve language teaching and learning. It reimagines educational practice for language teaching and learning through the integration of educational technology for making the language teaching and learning process more efficient and engaging while improving learner performance and progress. This book covers topics such as artificial intelligence, language education, and academic writing and is a useful resource for education professionals, language learners, computer engineers, academicians, scientists, and researchers.

Teaching with AI José Antonio Bowen, C. Edward Watson, 2025-12-02 Now completely revised. An essential guide on how AI is revolutionizing the future of learning and how educators can adapt to this new era of human thinking. Artificial Intelligence (AI) is revolutionizing the way we learn, work, and think. Its integration into classrooms and workplaces is already underway, transforming ideas about creativity, authorship, and education. In this practical guide, teachers will discover how to harness and manage AI as a powerful teaching tool. Jos Antonio Bowen and C. Edward Watson present emerging and powerful research on the seismic changes AI is already creating in schools and the workplace, providing invaluable insights into what AI can accomplish in the classroom and beyond. This second edition provides essential updates to new classes of tools, such as reasoning models, deep research, and agents, as well as many new assignment ideas and revised prompt ideas throughout. The authors expand the section on simulations and role playing and include a brand new section on customized bots. A new chapter on ethics and environmental concerns rounds out the collection. By learning how to use new AI tools and resources, educators will gain the confidence to navigate the challenges and seize the opportunities presented by AI. From interactive learning techniques to advanced assignment and assessment strategies, this comprehensive guide offers practical suggestions for integrating AI effectively into teaching and learning environments. Bowen and Watson tackle crucial questions related to academic integrity, cheating, and other emerging issues. In the age of AI, critical thinking skills, information literacy, and a liberal arts education are more important than ever. As AI continues to reshape the nature of work and human thinking, educators can equip students with the skills they need to thrive in a rapidly evolving world. This indispensable guide, a companion text to Joan Monahan Watson's book for K-12 instructors, *Learning with AI*, leads educators through the uncharted territory of AI-powered education and the future of teaching and learning.
