

Chapter 1 Test

Points: 87

Do you know HOW?

Identify a pattern and find the next three members in the pattern.

1. $-6, -2, 2, 6, \dots$

Each term is 4 more than the previous term. $10, 14, 18$

2. $100, 50, 25, 12.5, \dots$

Each term is half of the previous term. $6.25, 3.125$

3. What properties of real numbers are illustrated by each equation below?

a. $(-8) + (2) + (3) = (-8) + (5)$ Commutative Property of Addition

b. $(-4) + (2 + 6) = 2 + 4$ Associative Property of Addition

c. $(200)(-2) = (-2)(200)$ Commutative Property

d. $\left(\frac{1}{2}\right) \cdot \left(\frac{2}{3}\right) = \left(\frac{2}{3}\right) \cdot \left(\frac{1}{2}\right)$ Commutative Property of Multiplication

Evaluate the expression for the given value of the variable.

4. $x^2 + 20x + 3$ if $x = 3$ 93

5. $(20x + 3) + (2x + 20x) + 4$ 87

6. The expression $50x + 15$ models the daily cost in dollars of owning a dog that costs \$50 a month to groom. In the expression, x represents the number of months the owner plans to own the dog. What is the cost of owning a dog that is 4 months old? \$205

Write each equation.

7. $2x + 3 = 2x + 3$ 3

8. $4(x + 2) = 4x + 8$ 3

Write each equation for a. Show any necessary steps in the simplification.

9. $3\left(\frac{1}{2}x + 1\right) + 2 = 10$

$x = \frac{16}{3}$ or $5\frac{1}{3}$

10. $5\left(\frac{1}{2}x + 1\right) = 21$

$x = \frac{32}{5}$ or $6\frac{4}{5}$

Prentice Hall Algebra 1 Jan Fair,1992 **A Primer on Linear Models** John F. Monahan,2008-03-31 A Primer on Linear Models presents a unified thorough and rigorous development of the theory behind the statistical methodology of regression and analysis of variance ANOVA It seamlessly incorporates these concepts using non full rank design matrices and emphasizes the exact finite sample theory supporting common statistical methods Teacher's Guide and Tests for Merrill Algebra Two with Trigonometry Alan G. Foster,1979 HBJ Introductory Algebra 2 Russell F. Jacobs,1988 **Sums of Squares of Integers** Carlos J. Moreno,Samuel S. Wagstaff, Jr.,2005-12-09 Sums of Squares of Integers covers topics in combinatorial number theory as they relate to counting representations of integers as sums of a certain number of squares The book introduces a stimulating area of number theory where research continues to proliferate It is a book of firsts namely it is the first book to combine Liouville s elementary methods with the analytic methods of modular functions to study the representation of integers as sums of squares It is the first book to tell how to compute the number of representations of an integer n as the sum of s squares of integers for any s and n It is also the first book to give a proof of Szemerédi s theorem and is the first number theory book to discuss how the modern theory of modular forms complements and clarifies the classical fundamental results about sums of squares The book presents several existing yet still interesting and instructive examples of modular forms Two chapters develop useful properties of the Bernoulli numbers and illustrate arithmetic progressions proving the theorems of van der Waerden Roth and Szemerédi The book also explains applications of the theory to three problems that lie outside of number theory in the areas of cryptanalysis microwave radiation and diamond cutting The text is complemented by the inclusion of over one hundred exercises to test the reader s understanding Glencoe Algebra 1 ,2001 Standards-based School Mathematics Curricula Sharon L. Senk,Denisse R. Thompson,2020-07-24 The Curriculum and Evaluation Standards for School Mathematics published by the National Council of Teachers of Mathematics in 1989 set forth a broad vision of mathematical content and pedagogy for grades K 12 in the United States These Standards prompted the development of Standards based mathematics curricula What features characterize Standards based curricula How well do such curricula work To answer these questions the editors invited researchers who had investigated the implementation of 12 different Standards based mathematics curricula to describe the effects of these curricula on students learning and achievement and to provide evidence for any claims they made In particular authors were asked to identify content on which performance of students using Standards based materials differed from that of students using more traditional materials and content on which performance of these two groups of students was virtually identical Additionally four scholars not involved with the development of any of the materials were invited to write critical commentaries on the work reported in the other chapters Section I of Standards Based School Mathematics Curricula provides a historical background to place the current curriculum reform efforts in perspective a summary of recent recommendations to reform

school mathematics and a discussion of issues that arise when conducting research on student outcomes Sections II III and IV are devoted to research on mathematics curriculum projects for elementary middle and high schools respectively The final section is a commentary by Jeremy Kilpatrick Regents Professor of Mathematics Education at the University of Georgia on the research reported in this book It provides a historical perspective on the use of research to guide mathematics curriculum reform in schools and makes additional recommendations for further research In addition to the references provided at the end of each chapter other references about the Standards based curriculum projects are provided at the end of the book This volume is a valuable resource for all participants in discussions about school mathematics curricula including professors and graduate students interested in mathematics education curriculum development program evaluation or the history of education educational policy makers teachers parents principals and other school administrators The editors hope that the large body of empirical evidence and the thoughtful discussion of educational values found in this book will enable readers to engage in informed civil discourse about the goals and methods of school mathematics curricula and related research
