Students of Western civilization need more than facts. They need to understand the cross-cultural global exchanges that shaped Western history to be able to draw connections between the social, cultural, political, economic, and intellectual happenings in a given era and to see the West not as a fixed region but a living, evolving construct. These needs have long been central to *The Making of the West*. The book's chronological narrative emphasizes the wide variety of peoples and cultures that created Western civilization and places them together in a common context, enabling students to witness the unfolding of Western history, understand change over time, and recognize fundamental relationships.
