Understanding Environmental Pollution Marquita K. Hill, 2020-07-09 This undergraduate textbook examines environmental pollution ranging from our homes to the global environment Completely updated and with over 50% new and rewritten material this new edition assesses the international scope of pollution including water climate change acidification energy solid and hazardous waste persistent chemicals and pesticides The pollutants of current major concern are examined including plastics and electronic waste Both the impacts and the sources of pollution are addressed as well as governmental corporate and personal responsibility for pollution Pollution prevention is emphasized throughout but students will come to see that prevention is not enough The text moves on to examine a circular economy with closed loop systems where by products are reused wastes become raw materials water is recycled and energy is recovered from waste energy

Understanding Environmental Pollution engages students with the idea that humanity holds the tools to confronting the daunting pollution issues by considering a circular economy

Analysing Quantitative Data Raymond A Kent, 2015-03-16 This innovative book provides a fresh take on quantitative data analysis within the social sciences It presents variable based and case based approaches side by side encouraging you to learn a range of approaches and to understand which is the most appropriate for your research Using two multidisciplinary non experimental datasets throughout the book demonstrates that data analysis is really an active dialogue between ideas and evidence Each dataset is returned to throughout the chapters enabling you to see the role of the researcher in action it also showcases the difference between each approach and the significance of researchers decisions that must be made as you move through your analysis The book is divided into four clear sections Data and their presentation Variable based analyses Case based analyses Comparing and combining approaches Clear original and written for students this book should be compulsory reading for anyone looking to conduct non experimental quantitative data analysis
